Notes: Exchange rates provided by the European Central Bank.

All balance sheet data as of 31.12.2021 have been extracted from audited figures for FY 2021.

The P&L and Cash-flow data presented are based on published quarterly reports.

Financial highlights:

- ▶ Unaudited consolidated revenues increased to EUR 23.229 million in Q2 2022 from EUR 9.855 million in Q2 2021, up by 135.7% YOY.
- ▶ EBITDA increased to EUR 8.119 million in Q2 2022 from EUR 3.898 million in Q2 2021, up by 108.3% YOY.
- ▶ Record EBIT of EUR 4.640 million in Q2 2022 compared to EUR 0.968 million in Q2 2021.
- ▶ A net profit of EUR 2.030 million was recorded in Q2 2022 compared to a net loss of EUR -0.869 million a year ago.
- ▶ Total comprehensive income for the second quarter of 2022 amounted to EUR 0.546 million, compared to EUR 0.505 million recorded for the same period one year ago.
- ▶ Increased equity of EUR 53.935 million at the end of Q2 2022, compared to EUR 51.538 million at the end of 2021.
- ▶ The adjusted equity ratio (defined as total equity divided by total capital, being the sum of interest-bearing debt and equity) increased to 29.3%, compared to 28.6% at the end of 2021.
- ▶ The Company has raised its full-year 2022 guidance with revenue expectations of EUR 85 million from the previously communicated EUR 65 million (up 133.8% YoY) and an EBITDA of EUR 24 million from the previous EUR 18 million (up 150.4% YoY).

Other highlights:

- ▶ Photon Energy switched 43.5 MWp of its Hungarian PV portfolio to merchant electricity sales.
- ▶ Photon Energy broke ground on first two of 32 MWp solar projects in Romania to be built in 2022.
- ▶ Photon Energy share received 'Buy' recommendations from AlsterResearch, WOOD & Co. and IPOPEMA analysts.
- ▶ Photon Energy Group successfully tapped its 6.50% green bond to 65 million euros.

After the reporting period:

- ▶ Photon Energy broke ground on another three solar projects in Romania.

Notes:

Exchange rates are provided by the European Central Bank.

All balance sheet data as of 31.12.2021 have been extracted from audited figures for FY 2021.

All references to growth rate percentages compare the results of the reporting period to those of the prior year comparable period.

Total Comprehensive Income (TCI) is the sum of the profit after taxes plus Other Comprehensive income (OCI). According to IAS 16, Other comprehensive income includes revaluation of PPE in a proprietary portfolio to their fair values, share on OCI of associates and joint ventures and foreign currency translation differences.

EPC stands for Engineering, Procurement and Construction and refers to services related to project design, engineering, procurement and construction of solar power plants.

Throughout this report Photon Energy Group is referred to as the "Group", the "Company", the "Issuer" and/or "Photon Energy".

2. Management discussion and analysis

2.1 A note from the management board

Having achieved record revenues and earnings by driving strong growth across all our business lines in the first half of 2022, this year will probably go down in the Company's history as a truly pivotal period. In this Q2 reporting period only, we more than doubled our revenues YOY to a record level of EUR 23.229 million, while boosting our EBITDA by 108.3% to EUR 8.119 million and turning into the black at the pre-tax and after-tax levels. Considering this robust performance observed across our businesses in the first half of 2022, combined with our business outlook and solid project pipeline, we updated the Group's revenue expectations for the year 2022 to EUR 85 million from our previous guidance of up to EUR 65 million, and the Group's EBITDA target to EUR 24 million from our previous guidance of up to EUR 18 million.

During this first half year, we demonstrated our ability to rapidly adjust to changing market conditions by deciding to temporarily switch most of the Group's Hungarian power plants to the merchant model, meaning without any state support. As a result, revenues from the sale of electricity generated by the Group's growing portfolio benefited from the high electricity prices experienced globally. Selling electricity into the market is now a core part of our strategy which represents 83% of our total proprietary portfolio. Increases in other revenue streams were also experienced, mainly driven by the great momentum in the Group's PV component trading business, which distributes modules, inverters, and batteries.

On the project development front, we commissioned a 1.4 MWp power plant in Hungary and are progressing well with the construction of our first five power plants in Romania. Our first project in the country, where we plan to build 32 MWp by the end of the year, is starting to take shape as we have just completed the mounting structures and installed half of the total of 10,600 solar modules. The Company is currently developing utility-scale PV projects with a combined capacity of over 820 MWp in its key CEE markets and Australia.

As to our presence on capital markets, the second quarter of 2022 has been an exciting period, with the tap of our EUR green bond 2021/27 for EUR 10 million and the issuance of three BUY recommendations for our shares from three Research houses: AlsterResearch (Germany), WOOD & Company (Czech Republic) and IPOPEMA (Poland).

The current economic backdrop strengthens our results, directly affected by the sharp increase in energy prices and incurring a growing demand for renewable electricity generation technology (impacting our trading business) as replacement of traditional fossil sources. While we are embracing this environment to accelerate our transformation, we have an obligation to remain vigilant though, to respond to changing business conditions while not losing sight of our long-term goals and opportunities.

Financial results

The Group's second quarter results demonstrated exciting progress with consolidated revenues of EUR 23.229 million reported in the second quarter of the year 2022 (+135.7% YOY), and EUR 32.367 million for the first half year (+124.4% YOY). This increase in revenues is primarily connected with higher revenues from the production of electricity generated by our new power plants operating on a merchant basis (1.4 MWp connected to the grid in December 2021 and 14.6 MWp in August 2021), as well as the high electricity prices on the market-linked direct sales component of the "Green Bonus" support scheme, into which the Czech portfolio

switched at the beginning of the year. The Company also took important steps to underpin the growth of its business, including the decision to temporarily switch most of the Group's Hungarian IPP portfolio to a merchant model, representing 46.2 MWp out of the Company's 51.8 MWp Hungarian portfolio. Starting from April 2022, these power plants are not dependent on any kind of support mechanism. As a result, the Company saw revenues from the sale of electricity generated by the Group's growing portfolio benefit from rising electricity prices globally.

Besides the outstanding revenues from electricity production of EUR 10.963 million (+59.2% YOY), this strong outcome was driven by a remarkable increase in other revenue streams (EUR 12.266 million, +313.2% YOY). The latter was mainly attributable to the great momentum experienced by the Company's component trading business line, which distributes modules, inverters and now batteries, outshining a relatively more modest growth in O&M and EPC revenues.

This strong business performance led to a consolidated EBITDA improvement by 108.3% to EUR 8.119 million and resulted in a record Q2 EBIT of EUR 4.640 million compared to EUR 0.968 million in the same period last year by even absorbing the booking of a provision for the Hungarian windfall taxes adopted by the Hungarian government retrospectively in June 2022.

Most importantly, the Company turned around a EUR -0.565 million loss before taxation recorded in Q2 2021 to an outstanding EUR 2.619 million profit in Q2 2022, as well as its net profit with EUR 2.030 million achieved during the reporting period (vs. a EUR -0.869 million net loss in Q2 2021).

Despite a negative Other Comprehensive Income (OCI), affected by a weakening Hungarian Forint (HUF), the Company still reports an increased positive consolidated total comprehensive income for the quarter amounting to EUR 0.546 million, compared to EUR 0.505 million last year for the same period.

Year-to-date, Photon Energy closed a record first half of the year with revenues amounting to EUR 32.367 million, representing a 124.4% increase YOY, raised its EBITDA by 146.2% YOY to EUR 10.143 million. EBIT swung from a loss of EUR -0.507 million to a profit of EUR 5.609 million. Photon Energy recorded a net profit of EUR 0.539 million compared to a EUR -4.037 million loss in the first half of 2021. At the bottom line, TCI amounted to EUR 2.335 million compared to EUR 2.297 million a year ago. The adjusted equity ratio remained at a sound level of 29.3%.

Strong execution in Q2 drives full-year 2022 guidance upgrade

In the first half of the year, the continuing execution of our strategy yielded strong results: as of the end of Q2 2022, the Trailing twelve-month Revenues and EBITDA amounted to EUR 54.301 million and EUR 15.606 million, respectively, putting us on the right trajectory to exceed our guidance for 2022.

Considering the robust performance observed across our businesses in the first half of 2022, combined with our business outlook and our solid project pipeline, we updated the Group's revenue expectations for the year 2022 to EUR 85 million from its previous guidance of up to EUR 65 million, representing a 133.8% (previously 78.8%) increase compared to audited revenues of EUR 36.4 million in 2021. As a result, the Group's EBITDA target was raised to EUR 24 million from its previous guidance of up to EUR 18 million, representing a +150.4% YOY (previously 87.8%).

Other key highlights for the second quarter of 2022 up to the reporting date are detailed below:

Photon Energy switches 43.5 MWp of its Hungarian PV portfolio to merchant electricity sales

From 1 April 2022 the Group has temporarily switched all Hungarian PV power plants in its proprietary portfolio receiving support on the basis of KÁT-licenses and METÁR-KÁT-licenses to selling the produced electricity on the Hungarian day-ahead-market to benefit from the currently much higher electricity prices effective from 1 April 2022.

Government Decree No 787/2021 (XII.27.), published in the Hungarian Official Gazette on 27 December 2021, which came into effect on 1 January 2022, allows PV power plants to temporarily exit the support schemes and to return to the respective support scheme at any time after a 12-month-period.

The Group also permanently opted out of six of ten METÁR licenses for its PV power plants in Puspokladány and will be selling the produced electricity on the Hungarian day-ahead-market to benefit from the currently much higher electricity prices.

Photon Energy's portfolio of KÁT- and METÁR-KÁT-licensed PV power plants consists of 51 units with a total installed capacity of 35.0 MWp. The six METÁR-licensed PV power plants which have permanently exited the support scheme have a combined installed capacity of 8.5 MWp and the four METÁR-licensed PV power plants remaining in the support scheme have a total installed capacity of 5.6 MWp.

The Management Board of the Group is convinced that based on the current electricity market outlook for the following 24-36 months this mostly reversible exit from the Hungarian support scheme strongly improves the Group's profitability and maximizes the return on investment on its Hungarian portfolio.

Photon Energy Group Expands its IPP Portfolio to 92 MWp

During the reporting period, the Group completed and grid-connected its second photovoltaic power plant near the municipality of Tolna, Hungary. This latest addition of 1.4 MWp expands the Company's portfolio of proprietary power plants in Hungary to a total of 63, with a combined capacity of 51.8 MWp. Globally, the Company now owns and operates 88 power plants with a combined capacity of 91.9 MWp.

The new power plant extends over 2.8 hectares and uses bi-facial PV modules mounted on single-axis trackers. Connected to the grid of E.ON Dél-dunántúli Áramhálózati Zrt., the installation is expected to generate around 2.1 GWh of clean electricity per year. Given the current market price developments, the original expected revenues of EUR 440,000 in the next 12 months will be significantly outperformed.

The total investment into the development and construction of the power plant was EUR 1.0 million and was financed by the proceeds of Photon Energy Group's 6.50% Green EUR Bond 2021/27, with a placed volume of EUR 65.0 million.

The Company developed the project fully in-house and delivered engineering, procurement and construction services through its subsidiary Photon Energy Solutions HU Kft. Photon Energy Operations HU Kft. – another of the Group's subsidiaries – is providing long-term monitoring, operations and maintenance services to the power plant.

Photon Energy breaks ground on five solar projects in Romania

We are very excited to have broken ground for five Romanian PV power plants with a combined generation capacity of 16.5 MWp. High-efficiency bifacial solar modules mounted on single-axis

trackers will deliver around 25.1 GWh of renewable energy annually to the grid. The electricity generated will be sold on the energy market on a merchant basis, without any support or a power purchase agreement with an energy offtaker. The new power plants are scheduled to commence operations in the fourth quarter of 2022.

Those five power plants in Siria, Aiud, and Calafat mark an important step in our efforts to commission a total capacity of around 32 MWp in Romania by the end of 2022. These new assets will expand our IPP (independent power producer) portfolio to over 120 MWp by the end of the year.

Upon the commissioning of these five plants, the Company will own and operate 93 solar power plants with a combined generation capacity of 108.3 MWp as part of its IPP portfolio, of which a combined 96 MWp will be selling clean electricity directly on the energy market.

The Company is currently developing utility-scale PV projects with a combined capacity of over 820 MWp in its key CEE markets and Australia, including 235 MWp in Romania. The remaining project development pipeline in Romania is expected to be built and commissioned in 2023 and 2024 and thus the Romanian market will contribute significantly to the Company's goal of expanding its IPP portfolio to at least 600 MWp globally by the end of 2024.

Photon Energy Share Receives 'Buy' Recommendations from AlsterResearch, WOOD & Company, and IPOPEMA

During the reporting period, the Company's stock has been given a 'buy' recommendation by AlsterResearch, a Hamburg-based research house specialising in small and mid-caps. AlsterResearch views solar as a crucial building block in the decarbonisation of economies and thus expects it to be the fastest growing renewable energy source. Photon Energy Group fits well into this trend, combining strong ESG credentials with transparent reporting and open capital market communications.

Shortly afterwards, the stock has also been given 'Buy' recommendations by Prague-based WOOD & Company, one of the leading brokerage companies in Central and Eastern Europe and IPOPEMA, a Poland-based company engaged in investment banking and brokerage services. An overview of the analysts' recommendations is available on the company's IR page:

Institution	Reco.	Target Price EUR	Target Price PLN	Target Price CZK	Date
Alster Research	BUY	EUR 4.10*	PLN 18.89	CZK 101	25.04.22
IPOPEMA	BUY	EUR 3.16	PLN 14.58	CZK 78	24.05.22
WOOD & Company	BUY	EUR 3.41	PLN 15.69	CZK 84	25.05.22
Consensus		EUR 3.69	PLN 17.01	CZK 91	

* Prices in bold stated by research reports; other currencies included for reference.

Photon Energy successfully taps its 6.50% green bond to EUR 65 million

During the reporting period, the Company successfully tapped its 6.50% Green EUR Bond 2021/2027 (ISIN: DE000A3KWKY4) in the amount of EUR 10 million to a total outstanding amount of EUR 65 million. The bond tap was met with strong demand from the Company's existing bondholders including the European Bank for Reconstruction and Development ('EBRD') as well as numerous new institutional investors across Europe.

The green bond with a maturity in 2027 and an interest rate of 6.50% p.a., paid quarterly has been graded by imug | rating with regard to its sustainability by way of a Secondary Party Opinion,

and is trading on the Open Market of the Frankfurt Stock Exchange since 23 November 2021.

Bankhaus Scheich Wertpapierspezialist AG, Frankfurt am Main, has acted as Sole Global Coordinator & Bookrunner for the bond placement. Multinational law firm Pinsent Masons has acted as legal advisor to the transaction.

2.2 Strategy and its execution

The Group's focus for future growth lays on the established Australian and Hungarian markets and the newly added Polish and Romanian markets for the expansion of PV generation capacity. Further markets in Central Europe, Central and South America, the Middle East, and Africa remain under the Group's investigation.

The Group also intends to continue to disrupt and transform the PV industry. This is illustrated by the recent strategic investments concluded with RayGen, a company specialized in high efficiency concentrated PV generation with thermal absorption and storage, and with Lerta at the end of the reporting period, developing Virtual Power Plant technologies and energy market services.

In addition, the Group's focus remains on the expansion of operations & maintenance (O&M) solutions in Central Europe and Australia and selective entry to new markets following its customers, and the development of various water treatment technologies and the preparation for their commercialization.

The Group's strategic goals include:

- ▶ An increase in the production of clean energy by expanding the Group's global electricity generation capacity of the proprietary portfolio of photovoltaic power plants;
- ▶ the acquisition of new PV projects to develop, design and construct them for the proprietary portfolio supporting the

The Company intends to use the net proceeds of the green bond placement to finance or refinance, in part or in whole, new and/or existing eligible assets, as well as financial instruments that were used to finance such projects or assets, in accordance with the Company's Green Finance Framework, enabling Photon Energy Group to make a significant contribution to an environmentally friendly future.

growth of recurring revenue streams from clean electricity generation with a clear focus on Australia, Hungary, Poland and Romania;

- ▶ the expansion of the PPA-business and construction of commercial "behind-the-meter" PV projects for industrial customers and off-takers in Australia and in Europe;
- ▶ the Group intends to compete for PV projects, which aim to address the needs for provision of clean energy in locations which require a tailor-made approach to design complete energy systems, which would combine generation of clean energy with energy storage solutions; such PV projects require an integrated approach in the application of PV technology;
- ▶ the provision of O&M services allowing PV power plants to run smoothly at high generation levels and increasing revenues while reducing risks for the Group's customers;
- ▶ the procurement and trading of PV components through cooperation with PV technology manufacturers; and
- ▶ the remediation of contaminated sites and ground water pollution deploying water treatment technologies with a focus on PFAS nano-remediation solutions.

2.4 Proprietary portfolio, generation results and O&M services

Proprietary portfolio

The table below presents the portfolio of operating power plants owned directly or indirectly by Photon Energy N.V. at the end of the reporting period i.e. as of 30 June 2022, consisting of 88 power plants in the Czech Republic, Slovakia, Hungary and Australia with a total installed capacity of 91.9 MWp.

More information on the Group structure can be found in chapter 10. Group structure.

Table 1. The proprietary portfolio of Photon Energy N.V. as of 30 June 2022

¹ Photon SPV 3 owns two power plants: Mostkovice SPV 3 (795 kWp) and Mostkovice SPV3R (131 kWp).

Generation results

The cumulative generation results of the power plants in the portfolio connected and feeding electricity to the grid in Q2 2022 amounted to 39.3 GWh, which was 21.2% higher YOY and 1.5% above energy forecasts. This represents an avoidance of 14,758

tonnes of CO₂ emissions in Q2 2022, compared to 12,983 tonnes in Q2 2021. Detailed generation results for each power plant are published on a monthly basis in our monthly reports.

Table 2. Generation results versus projections between 1 April and 30 June 2022

O&M services

Photon Energy remained focused on delivering Operations & Maintenance services. As of the end of Q2 2022, full O&M services contracts amounted to approximately 250.3 MWp (+1.3% YOYD). This can be broken down geographically into 94.9 MWp operated in the Czech Republic, 102.1 MWp in Hungary, 15.3 MWp in Slovakia, 24.1 MWp in Australia, 4.0 MWp in Romania and 9.9 MWp in Poland. The O&M portfolio divides into 158.4 MWp serviced for external clients and 91.9 MWp of PV capacity from the proprietary portfolio.

As far as the "Inverter Cardio" services contracts are concerned, the Group is servicing 60.2 MWp of central inverters (-3.2% compared to Q2 2021). In detail, at the end of Q2 2022, the total capacity of central inverters serviced can be divided regionally into 18.3 MWp in France, 6.0 MWp in Italy, 9.7 MWp in Belgium, 17.0

MWp in the Czech Republic, 5.5 MWp in Slovakia, 2.0 MWp in Slovenia and 1.8 MWp in Germany. In some countries like France or Germany the Group is holding a leading market position while in Belgium in particular, the Group is servicing all of the Satcon inverters ever installed.

After the end of the reporting period, the conclusion of full O&M services contracts in Hungary (+16.8 MWp) brought the total capacity under O&M contract (full O&M services and Inverter Cardio services contracts) to 327.3 MWp (vs. 310.5 MWp as of 30 June 2022).

2.5 Reporting on Photon Energy's project pipeline

Project development is a crucial activity in Photon Energy's business model of covering the entire value chain of PV power plants. The main objective of project development activities is to expand the PV proprietary portfolio, which provides recurring revenues and free cash flows to the Group. For financial or strategic reasons Photon Energy may decide to cooperate with third-party investors either on a joint-venture basis or with the goal of exiting the projects to such investors entirely. Ownership of project rights provides Photon Energy with a high level of control and allows locking in EPC (one-off) and O&M (long-term) services. Hence, project development is a key driver for Photon Energy's future growth. The

Group's experience in project development and financing in the Czech Republic, Slovakia, Germany, Italy and Hungary is an important factor in selecting attractive markets and reducing the inherent risks related to project development.

Photon Energy is currently developing PV projects in Australia (300.0 MWp), Hungary (25.8 MWp), Romania (235.4 MWp) and Poland (263.9 MWp) and is evaluating further markets for opportunities.

Country	1. Feasibility*	2. Early development	3. Advanced development	4. Ready-to-build technical	5. Under construction	Total in MWp
 Romania	33.2	81.5	87.9	16.3	16.5	235.4
 Poland	234.0	29.9	-	-	-	263.9
 Hungary	-	23.1	2.7	-	-	25.8
 Australia	-	300.0	-	-	-	300.0
Total in MWp	267.2	434.5	90.6	16.3	16.5	825.1

*Development phases are described in the glossary available at the end of this chapter.

PV projects have two definitions of capacity. The grid connection capacity is expressed as the maximum of kilowatts or megawatts which can be fed into the grid at any point in time. Electricity grids run on alternating current (AC). Solar modules produce direct current (DC), which is transformed into AC by inverters. Heat, cable lines, inverters and transformers lead to energy losses in the system between the solar modules and the grid connection point. Cumulatively system losses typically add up to 15-20%. Therefore, for a given grid connection capacity a larger module capacity (expressed in Watt peak – Wp) can be installed without exceeding the

grid connection limit. At times of extremely high production, inverters can reduce the volume of electricity so that the plant stays within the grid connection limits. Photon Energy will refer to the installed DC capacity of projects expressed in Megawatt peak (MWp) in its reporting, which might fluctuate over the project development process.

Projects having reached an advanced development phase, as well as projects for which sufficient details can be disclosed are described in the table below:

Country	Location	Dvt Phase	Project function	Share	MWp	Commercial Model	Land	Grid connection	Construction permit	Expected RTB
Romania	Siria	5	Own portfolio	100%	5.7	Merchant/PPA	Secured	Secured	Secured	Under construction
Romania	Aiud	5	Own portfolio	100%	4.7	Merchant/PPA	Secured	Secured	Secured	Under construction
Romania	Calafat	5	Own portfolio	100%	6.1	Merchant/PPA	Secured	Secured	Secured	Under construction

Australia	Yadnarie	2	All options open	100%	300.0	All options open	Secured	Ongoing	Ongoing	Q4 2023

Australia

During the reporting period, Photon Energy had one large scale solar farm under development.

In November 2021, the Group secured 1,200 hectares of land in South Australia to develop a 300 MWp solar farm suitable for RayGen's solar technology in combination with its energy storage solution.

- ▶ **Development status Raygen project (300 MWp):** Based on preliminary designs, Photon Energy will develop a solar generation capacity of 300 MWp with a grid connection capacity of 150 MW. The target storage energy storage capacity is 3.6 GWh, equivalent to 24 hours of full load, to the grid, from storage. This will exceed the 3 GWh capacity of the Ouarzazate Solar Power Station in Morocco, which currently has the world's largest energy storage capacity of any type, excluding pumped hydro.

The project received Crown Sponsorship from the South Australian Government for development approval. Crown Sponsorship is a development process undertaken directly with, in this case, the Department of Energy and Mining, as a development of public infrastructure under section 49(2)(c) of the Development Act 1993 for the approval of the project

with the South Australian Government. The proposed development complies with the requirements of the Technical Regulator in relation to the security and stability of the State's power system. In parallel, Photon Energy has applied for grid connection for the project to the Electranet transmission network and has engaged a grid connection consultant to manage the process and conduct Grid Performance Studies which will be submitted for approval.

In Q1 2022, Photon Energy conducted already Community consultation sessions with very positive response from both the community and the local council. The local council is very supportive of the project and has expressed interest in working with Photon Energy on accommodation and local supply chain in any areas that will be mutually beneficial to both the local community and the project.

Hungary

Below is a short summary of projects and progress achieved in the reporting period.

- ▶ **Tolna 3-13 projects (25.8 MWp under development, 1.4 MWp commissioned on 9 December 2021 and 1.4 MWp commissioned on 5 May 2022):** The thirteen projects with a total planned installed DC capacity of 28.6 MWp are located in the Tolna region in the south of Hungary. Two power plants have a grid connection capacity of 5.0 MW AC each, whereas 1 MW AC have been secured for each of the remaining eleven projects. The grid connection points have been secured and the negotiations for suitable land plots have been finalized for several projects. Grid connection plans have been initiated and already partially approved, to allow us to conclude grid connection agreements with E.ON. with a validity of two years.

On 8 December 2020, one of the 1MW AC (approx. 1.4 MWp DC) projects was granted a METAR premium of 24,470 HUF/MWh (approx. EUR 68 per MWh) with a maximum supported production of 21,585 MWh over a period of up to 15 years. This achievement results from the approval of the project application to the first pilot tender for the METAR system organized in September 2019. Outside this project, two power plants have been constructed and commissioned to date, with a third one in advanced development after securing the binding extraction and construction permits.

The revenue model will be the direct sale of electricity through a trader on the Hungarian electricity market for the time being. Entering into a contract-for-difference based on a METAR license (for the project that has proven successful through the auction process) or entering into PPAs in the future, remain possible options. Construction plans include the use of tracking technology allowing bi-facial solar modules to follow the course of the sun, which are expected to achieve a 15-20% higher specific performance than fixed installations.

On 9 December 2021, we completed and grid-connected the first photovoltaic power plant with a capacity of 1.4 MWp near the municipality of Tolna.

On 5 May 2022, we completed and grid-connected the second photovoltaic power plant with a capacity of 1.4 MWp near Tolna.

These latest additions expand the Company's portfolio of proprietary power plants in Hungary to a total of 63, with a combined capacity of 51.8 MWp.

The two power plants represent the first European utility-scale PV power plants in Photon Energy Group's IPP portfolio that the Company operates without a support scheme. The total annual production of each power plant is expected to be around 2.1 GWh, which corresponds to expected annual revenues of EUR 440,000 based on current forward prices for electricity base load in Hungary.

Each of these new power plants extends over 2.2 hectares, uses bi-facial PV modules mounted on single-axis trackers and is connected to the grid of E.ON Dél-dunántúli Áramhálózati Zrt..

The electricity is sold on the national electricity market on a merchant basis. This means no power purchase agreements (PPAs) have been entered into by the Company. However, they may play a role in the plant's future revenue management strategy, alongside other hedging options.

The Company developed the projects fully in-house and delivered engineering, procurement and construction services through its subsidiary Photon Energy Solutions HU Kft. Photon Energy Operations HU Kft. – another of the Group's subsidiaries – will provide long-term monitoring, operations and maintenance services to the power plants.

Romania

Below is a short summary of projects and progress achieved in the reporting period and before the publication of this report:

- ▶ **Siria (5.7 MWp) project:**

In June 2022, the Company broke ground on the construction of its very first Romanian PV power plant with a generation capacity of 5.7 MWp. High efficiency bifacial solar modules mounted on single-axis trackers will deliver around 8.7 GWh of renewable energy annually to the grid of Enel E-Distributie Banat. Located near Şiria in Romania's Arad County, the power plant will extend over 9.3 hectares of greenfield land and will be equipped with some 10,600 solar panels.

- ▶ **Aiud (4.7 MWp) project:**

In July 2022, the Company announced that it started the construction of its second Romanian PV power plant in Aiud with a capacity of 4.7 MWp and an expected annual generation of 6.8 GWh that will be delivered to the grid of Distribuție Energie Electrică Romania. Located near Aiud in Romania's Alba County, the power plant will extend over 6.6 hectares of greenfield land and will be equipped with around 8,700 solar panels.

► **Calafat (6.1 MWp) project:**

In July 2022, the Company announced that it started the construction of another three Romanian PV power plants in Calafat with a combined capacity of 6.1 MWp and an expected annual generation of 9.6 GWh that will be delivered to the grid of Distribuție Energie Oltenia.

The five power plants are scheduled to commence operations in the fourth quarter of 2022 and to sell electricity on the energy market on a merchant basis, that is without any support or a power purchase agreement with an energy offtaker.

Upon the commissioning of these plants, the Company will own and operate 93 solar power plants with a combined generation capacity of 108.3 MWp in its IPP portfolio. A combined 92 MWp will be selling subsidy-free clean electricity directly on the energy market.

The Company is currently developing utility-scale solar PV projects with a combined capacity of 235.4 MWp in Romania. The remaining project development pipeline is expected to be built and commissioned in 2023 and 2024 and thus the Romanian market will significantly contribute to the Company's goal of expanding its IPP portfolio to at least 600 MWp globally by the end of 2024.

All projects to be built in Romania will be selling electricity after grid connection on a merchant basis into the grid.

Glossary of terms	Definitions
Development phase 1: "Feasibility"	LOI or MOU signed, location scouted and analyzed, working on land lease/purchase, environmental assessment and application for grid connection.
Development phase 2: "Early development"	Signing of land option, lease or purchase agreement, Environmental assessment (environmental impact studies "EIS" for Australia), preliminary design. Specific to Europe: Application for Grid capacity, start work on permitting aspects (construction, connection line, etc.). Specific to Australia: community consultation, technical studies.
Development phase 3: "Advanced development"	In Europe: Finishing work on construction permitting, Receiving of MGT (HU)/ATR (ROM) Letter, Finishing work on permitting for connection line, etc. In Australia: Site footprint and layout finalised, Environmental Impact Statement and development application lodged. Grid connection studies and design submitted.
Development phase 4: "Ready-to-build technical"	In Europe: Project is technical ready to build, we work on offtake model (if not FIT or auction), securing financing (internal/external). In Australia: Development application approved, offer to connect to grid received and detailed design commenced. Financing and off-take models/arrangements (internal/external) under negotiation.
Development phase 5: "Under construction"	Procurement of components, site construction until the connection to the grid. On top for Australian projects, signature of Financing and off-take agreements, reception of Construction certificate, conclusion of connection agreement, EPC agreement, Grid connection works agreements.
NSW Department for Planning and Environment (DP&E)	NSW DP&E is a government agency in charge of planning and development of New South Wales, to ensure the balance between the commercial business development and the needs of local communities. Each project submitted to DP&E must include environmental impact studies (EIS) and once it is reviewed by DP&E, the project is published and available for the public opinion to submit their comments. If the project is rejected by more than 25 people it is moved to Independent Planning Committee (IPC) for review. If there is no public opposition, the project is approved and DP&E issues the project Development Approval (DA)
Independent Planning Committee (IPC)	In case more than 25 public petitions against the project are submitted, IPC needs to investigate further into social and environmental impact of the project. IPC might make some recommendations to be made to the project plan to secure the issuance of DA.
Essential Energy	Essential Energy is Distribution Network Service Provider, which operates and manages low voltage electricity network in NSW. The process to secure the grid connection with Essential Energy includes GPS and AEMO's license.
Transgrid	Transgrid is a Distribution Network Service Provider (DNSP), which operates and manages the NSW high voltage transmission network. Transgrid, in co-operation with Australian Energy Market Operator (AEMO, see description below), is in charge of grid connection approval. To issue its decision Transgrid requires Generation Protection Studies (GPS). GPS is a complete analysis and tests of the impact that a potential power plant would have on the grid. Each power plant is tested under different assumptions (extreme weather conditions, demand/supply changes etc.) and its performance/impact on the grid's stability is thoroughly analysed. Once GPS are completed and accepted, Transgrid is issuing grid connection terms. Those terms are part of the agreement signed with Transgrid, which together with AEMO license secures and finalizes the grid connection process.
Australian Energy Market Operator (AEMO)	AEMO is responsible for operating Australia's largest gas and electricity markets and power systems. AEMO is overlooking all energy producers in NSW and is involved in the process of grid connection approval. AEMO reviews the grid connection terms and GPS studies and issues the license to feed electricity to the grid. AEMO also controls the on-going power generation to make sure that grid stability is maintained.

2.6 Enterprise value & Share price performance

2.6.1 Main market of the Warsaw Stock Exchange

On 30 June 2022 the Company's shares (ISIN NL0010391108) closed at a price of PLN 9.75 (-10.1% MoM), corresponding to a price to book ratio of 2.14. The Company also reports an average monthly trading volume of 319,156 shares in Q2 2022, compared to an average monthly trading volume of 464,926 over the past twelve months.

Trading of the Company's shares on the regulated market of the Warsaw Stock Exchange (WSE) (Giełda Papierów Wartościowych w Warszawie) commenced on 5 January 2021. Prior to that date, data presented in this section have been extracted from the trading activity on NewConnect.

Chart 2. Total monthly volumes vs. daily closing stock prices

Chart 3. Enterprise value vs. trailing 12 months (TTM) EBITDA

Chart 4. Enterprise value / trailing 12 months EBITDA and price to book ratio

Notes:

EV – Enterprise value is calculated as the market capitalisation as of the end of the reporting month, plus net debt, defined as Interest-bearing liabilities minus Liquid assets.

The trailing 12-month EBITDA is the sum of EBITDA reported in the last four quarterly reports including this reporting period, ie. Q3 2021, Q4 2021 Q1 2022 and Q2 2022.

Price/book ratio – is calculated by dividing the closing price of the stock as of the end of the reporting period by the book value per share reported in the last quarterly report.

EV/EBITDA ratio – is calculated by dividing the Enterprise Value by the Trailing 12 months (TTM) EBITDA.

2.6.2 Main market of the Prague Stock Exchange

On 30 June 2022 the share price (ISIN NL0010391108) closed at a level of CZK 51.90 (+14.6% compared to last quarter), corresponding to a price to book ratio of 2.15. The Company reports an average monthly trading volume of 407,699 shares in Q2 2022 compared to an average of 409,101 over the past twelve months.

Trading of the Company's shares on the regulated market of the Prague Stock Exchange (PSE) (Burza cenných papírů Praha) commenced on 5 January 2021. Prior to that date, data have been extracted from the trading activity on the Free Market of the Prague Stock Exchange.

2.6.3 Quotation Board of the Frankfurt Stock Exchange

On 30 June 2022, the share price (FSX: A1T9KW) closed at a level of EUR 2.06 (+12.3% compared to last quarter), corresponding to a price to book ratio of 2.15.

The Company reports a monthly trading volume of 48,457 shares in Q2 2022 compared to an average of 37,025 over the past twelve months.

The Company's shares have been traded on the Quotation Board of the Frankfurt Stock Exchange since 11 January 2021.

Since 28 July 2020, the Company's shares have already been traded on the Free Market (Freiverkehr) of the Munich Stock Exchange.

In addition, the Company's shares have also been traded on the Free Market (Freiverkehr) of the Berlin Stock Exchange since 13 January 2021 and on the Free Market (Freiverkehr) of the Stuttgart Stock Exchange since 14 January 2021.

2.7 Bond trading performance

In December 2016 the Company issued a 7-year corporate bond with a 6% annual coupon and monthly payments in the Czech Republic. The corporate bond (ISIN CZ0000000815) with a nominal value of CZK 30,000 has been traded on the Free Market of the Prague Stock Exchange since 12 December 2016.

On 27 October 2017 the Company issued a 5-year corporate EUR bond with a 7.75% annual coupon and quarterly coupon payments in Germany, Austria and Luxembourg. The original target volume of EUR 30 million was successfully increased in two steps with all parameters unchanged, to an outstanding amount of EUR 45.0 million prior to the completion of the exchange offer described below. The corporate bond (ISIN DE000A19MFH4) with a nominal value of EUR 1,000 has been traded on the Open Market of the Frankfurt Stock exchange since 27 October 2017. The bond is also listed on the stock exchanges in Berlin, Hamburg, Hannover, Munich and Stuttgart. The total outstanding bond volume amounts to EUR 22.409 million as of the end of the reporting period respectively EUR 20.956 million as of the reporting date.

On 17 November 2021, The Company successfully placed its 6.50% Green EUR Bond 2021/2027 (ISIN: DE000A3KWKY4) in the amount of EUR 50 million. The bond issuance was met with strong demand from the Company's existing bondholders, who

subscribed to EUR 21.281 million in the exchange that was offered for the existing EUR Bond 2017/2022. The green bond – with an interest rate of 6.50% p.a., paid quarterly – was confirmed by imug | rating with regard to its sustainability in a Second Party Opinion, and can be traded on the Open Market of the Frankfurt Stock Exchange.

On 29 November 2021, the Group successfully increased the bond placement by EUR 5.0 million with all parameters unchanged. The total outstanding bond volume amounts to EUR 55.0 million as of the end of the reporting period.

In May 2022, the Company successfully tapped its 6.50% Green EUR Bond 2021/2027 (ISIN: DE000A3KWKY4) in the amount of EUR 10 million to a total outstanding amount of EUR 65 million.

The Company intends to use the net proceeds of the green bond placement to finance or refinance, in part or in whole, new and/or existing eligible assets, as well as financial instruments that were used to finance such projects or assets, in accordance with the Company's Green Finance Framework, enabling Photon Energy Group to make a significant contribution to an environmentally friendly future.

2.7.1 EUR Bond 2017-22 trading performance

EUR Bond 2017/22 trading performance to date

In the trading period from 25 October 2017 until 30 June 2022, the trading volume amounted to EUR 31.788 million with an opening price of 100.00 and a closing price of 100.00 in Frankfurt. During this period the average daily turnover amounted to EUR 26,825.

EUR Bond 2017/22 trading performance in Q2 2022

In Q2 2022, the trading volume in Frankfurt amounted to EUR 220,000 (compared to EUR 784,000 in Q1 2022), with an opening and closing price of 100.00. The average daily turnover in Q1 2022 amounted to EUR 3,492 compared to EUR 12,250 in Q1 2022.

Chart 5. The Company's EUR bond 2017/22 trading on the Frankfurt Stock Exchange in Germany

2.7.2 Green EUR Bond 2021/27 trading performance

Green EUR Bond 2021/27 trading performance to date

In the trading period from 17 November 2021 until 30 June 2022, the trading volume amounted to EUR 6.671 million with an opening price of 100.00 and a closing price of 99.00 in Frankfurt. During this period the average daily turnover amounted to EUR 39,241.

Green EUR Bond 2021/27 trading performance in Q2 2022

In Q2 2022, the trading volume in Frankfurt amounted to EUR 456,000 (compared to EUR 1,491,000 in Q1 2022), with an opening price of 99.70 and a closing price of 99.00. The average daily

turnover in Q2 2022 amounted to EUR 7,238 compared to EUR 14,062 in Q1 2022.

2.7.3 CZK Bond trading performance in Prague

In the trading period from 12 December 2016 until 30 June 2022, the trading volume amounted to CZK 40.500 million with a closing price of 98.00.

2.8. Financial statement analysis

Profit and Loss statement

The Group's second quarter results demonstrated exciting progress with consolidated revenues of EUR 23.229 million reported in the second quarter of the year 2022 (+135.7% YOY), and EUR 32.367 million for the first half year (+124.4% YOY). This increase in revenues is primarily connected with higher revenues from the production of electricity generated by our new power plants operating on a merchant basis (1.4 MWp connected to the grid in December 2021 and 14.6 MWp in August 2021), as well as the high electricity prices on the market-linked direct sales component of the "Green Bonus" support scheme, into which the Czech portfolio switched since the beginning of the year. The Company also took important steps to underpin the growth of its business, including the decision to temporarily switch most of the Group's Hungarian IPP portfolio to a merchant model, representing 46.2 MWp out of the Company's 51.8 MWp Hungarian portfolio; starting from April 2022, these power plants were not dependent on any kind of support mechanism. As a result, the Company saw revenues from the sale of electricity generated by the Group's growing portfolio benefit from rising electricity prices globally.

Besides the outstanding revenue from electricity production of EUR 10.963 million (+59.2% YOY), this strong outcome was driven by a remarkable increase in other revenue streams (EUR 12.266 million, +313.2% YOY). The latter was mainly attributable to the great momentum experienced by the Company's component trading business line, which distributes modules, inverters, and now batteries, outshining a relatively more modest growth in O&M and EPC revenues.

This strong business performance led to a consolidated EBITDA improvement by 108.3% to EUR 8.119 million and incurred a record Q2 EBIT of EUR 4.640 million compared to EUR 0.968 million in the same period last year absorbing the booking of a provision for the Hungarian windfall taxes adopted by the Hungarian government retrospectively in June 2022.

Most importantly, the Company turned around a EUR -0.565 million loss before taxation recorded in Q2 2021 to an outstanding EUR 2.619 million in Q2 2022, as well as its net profit with EUR 2.030 million achieved during the reporting period (vs. a EUR -0.869 million net loss in Q2 2021).

Despite a negative Other Comprehensive Income (OCI), affected by a weakening Hungarian Forint (HUF), the Company still reports an increased positive consolidated total comprehensive income for the quarter amounting to EUR 0.546 million, compared to EUR 0.505 million last year for the same period.

Year-to-date, Photon Energy closed a record first half of the year with revenues amounting to EUR 32.367 million, representing a 124.4% increase YOY, raised its EBITDA by 146.2% YOY to EUR 10.143 million. EBIT swung from a loss of EUR -0.507 million to a profit of EUR 5.609 million. Photon Energy recorded a net profit of EUR 0.539 million compared to a EUR -4.037 million loss in the first half of 2021. At the bottom line, TCI amounted to EUR 2.335 million compared to EUR 2.297 million a year ago. The adjusted equity ratio remained at a sound level of 29.3%.

Chart 6. Revenues, EBITDA and EBITDA margin

The data presented above are based on published quarterly reports, with figures adjusted to be consistent with the annual audited figures for 2021 made available after the publication of the 4th quarter.

Balance Sheet

Switching to the balance sheet, Total fixed assets amounted to EUR 140.667 million at the end of Q2 2022, representing a decrease of -1.3% compared to the end of 2021. This development is resulting from a weakening Hungarian Forint (HUF) impacting the EUR value of the Company's Hungarian portfolio, and the ongoing depreciation of our portfolio power plants, partially offset by the addition of the power plant commissioned in Tolna, Hungary and by an increase of our assets in progress in Romania.

Current assets increased by 13.7% compared to the end of 2021 to EUR 61.589 million as of the end of Q2 2022, resulting from an increase in trade and other receivables connected to our business growth, and an increased inventory, partially offset by a decrease in Liquid assets (see below "Cash flow").

Long term liabilities increased by 3.7% compared to the end of 2021 to EUR 115.243 million at the end of Q2 2022, due to the increased placement of our EUR Green bond amounting to EUR

10.0 million, the repayment of loans in accordance with the financing plans of the Company's portfolio of power plants, as well as to early loan repayments related to our Hungarian portfolio.

Current liabilities amounted to EUR 33.076 million at the end of Q2 2022, corresponding to a -2.6% decrease compared to the end of 2021, mainly due to a decrease in trade and other payables, and an early repayment of the Group's EUR 2017/22 bond by EUR 1.310 million to 22.409 million. The EUR 2017/22 bond will be repaid on 27 October 2022 sourced from existing liquid assets and additional long-term financing in line with the Company's financing strategy.

The adjusted equity ratio increased to 29.3%, compared to 28.8% at the end of 2021.

Chart 7. Net current assets

Chart 8. Breakdown of liabilities and equity

Changes in equity

Equity increased by 4.7% compared to the end of 2021 and amounted to EUR 53.935 million at the end of Q2 2022, reflecting the Total Comprehensive Income for the period. The adjusted equity ratio increased to 29.3% (vs. 28.8% at the end of 2021).

Cash Flow

Despite the increased strong EBITDA of EUR 8.119 million in Q2 2022, the Group posted a negative operating cash flow, which amounted to EUR -0.194 million, compared to EUR 1.227 million in Q2 2021. This development was mainly driven by an increase in trade receivables from energy generation, as well as the 25% delayed portion of the green bonus payments from OTE, the Czech electricity market operator, payable after the end of the quarter as well as increases in advances paid, in inventories, and increased receivables in line with the strong growing Technology sales.

2.9 Financial forecasts

The Group's updated revenue expectations for the year 2022 amount to EUR 85 million from a previous guidance of up to EUR 65 million set in April 2022, representing a 133.8% (previously

Investment cash flow equalled to EUR -3.364 million in Q2 2022 compared to EUR -3.614 million in Q2 2021, mainly related to work in progress for our proprietary portfolio in Romania, Poland, Hungary and the Czech Republic.

Financial cash flow amounted to EUR 3.872 million in Q2 2022, compared to EUR 3.861 million in Q2 2021, in line with the EUR 10 million increase of our EUR Green bond placement, an early repayment of our EUR 2017/22 bond for EUR 1.2 million, and scheduled repayments of bank financing and interest expenses and early loan repayments related to our Hungarian portfolio.

Overall, liquid assets increased to EUR 29.510 million at the end of Q2 2022 compared to EUR 29.141 million the end of Q1 2022.

78.8%) increase compared to audited revenues of EUR 36.4 million in 2021. The Group's updated EBITDA target was increased to EUR 24 million from a previous guidance of up to EUR 18 million, representing a +150.4% YOY (previously 87.8%).

3. General information about the Issuer

The table below presents general information about Photon Energy NV, hereinafter referred to as the "PENV", "Issuer", "the Group" and/or the "Company".

Company name:	Photon Energy N.V.
Registered office:	Barbara Strozziilaan 201, 1083 HN, Amsterdam, the Netherlands
Registration:	Dutch Chamber of Commerce (Kamer van Koophandel)
Company number:	51447126
Tax-ID:	NL850020827B01
Ticker:	PEN
Web:	www.photonenergy.com

4. Share capital of the Issuer

The Company's share capital is EUR 600,000 divided into 60,000,000 shares with a nominal value of EUR 0.01 each. The share capital is fully paid-up.

Share capital as of 30 June 2022

Series / issue	Type of shares	Type of preference	Limitation of right to shares	Number of shares	Nominal value of series/issue (EUR)	Capital covered with
A	bearer	-	-	60.000.000	600.000	cash
Total number of shares				60,000,000		
Total share capital					600,000	
Nominal value per share = EUR 0.01						

In the reporting period there were no changes to the share capital.

5. Shareholder structure

As of the reporting date to the knowledge of the Board of Directors of Photon Energy N.V., the shareholder structure was as follows:

Shareholdership as of 30.06.2022	No. of shares	% of capital	No. of votes at the Shareholders Meeting	% of votes at the Shareholders Meeting
Solar Future Cooperatief U.A.	21,775,075	36.29%	21,775,075	38.68%
Solar Power to the People Cooperatief U.A.	20,843,375	34.74%	20,843,375	37.03%
Photon Energy N.V.	3,708,258	6.18%	0	0.00%
Free float	13,673,292	22.79%	13,673,292	24.29%
Total	60,000,000	100.00%	56,291,742	100.00%

The free float includes shares allocated to the employee incentive programme. The disposition rights to these shares are limited and employees can dispose of these shares only under specific conditions.

6. Statutory bodies of the Issuer

Board of directors as of 30 June 2022

The Board of Directors is responsible for the day-to-day operations of the Company. The Issuer's Board of Directors has the following members:

Name	Position	Date of birth	Start of function
Georg Hotar	Director (<i>Bestuurder</i>)	21. 04. 1975	4 December 2020*
Michael Gartner	Director (<i>Bestuurder</i>)	29. 06. 1968	4 December 2020*

Mr Hotar and Mr Gartner have been the Company's managing directors since 9 December 2010, however, new term of their office (previously unlimited and currently term of four years) has started on 4 December 2020, due to the changes in the Company's corporate structure.

Supervisory board

On 4 December 2020, the shareholders of Photon Energy established in an extraordinary general meeting a two-tier board structure comprised of the existing management board and a new supervisory board.

The supervisory board provides guidance and oversight to the management board on the general affairs of the company. They also serve as audit committee.

On 31 May 2022, the Supervisory Board of the Company was extended from two to three members, Mrs. Boguslawa Skowronski, Mr. Marek Skreta, and Mr. Ariel Sergio Davidoff

As of today, the provisions in Dutch law, which are commonly referred to as the "large company regime" (*structuurregime*), do not apply to the Company. The Company does not intend to voluntarily apply to the "large company regime".

7. Description of the Issuer's business

Photon Energy NV is the holding company of the Photon Energy Group and was incorporated under the laws of the Netherlands on 9 December 2010. The Photon Energy Group ("Group") offers comprehensive solutions and maintenance services for photovoltaic systems that cover their entire lifecycle globally.

The Group is vertically integrated in the downstream segment of the photovoltaic industry. The company focuses on life-cycle services and delivers:

- ▶ **Projects:** Project development for rooftop and green-field installations from 300 kW to 300 MW.
- ▶ **Solutions (Engineering):** Design and construction of on-grid and off-grid installations, including battery storage solutions,

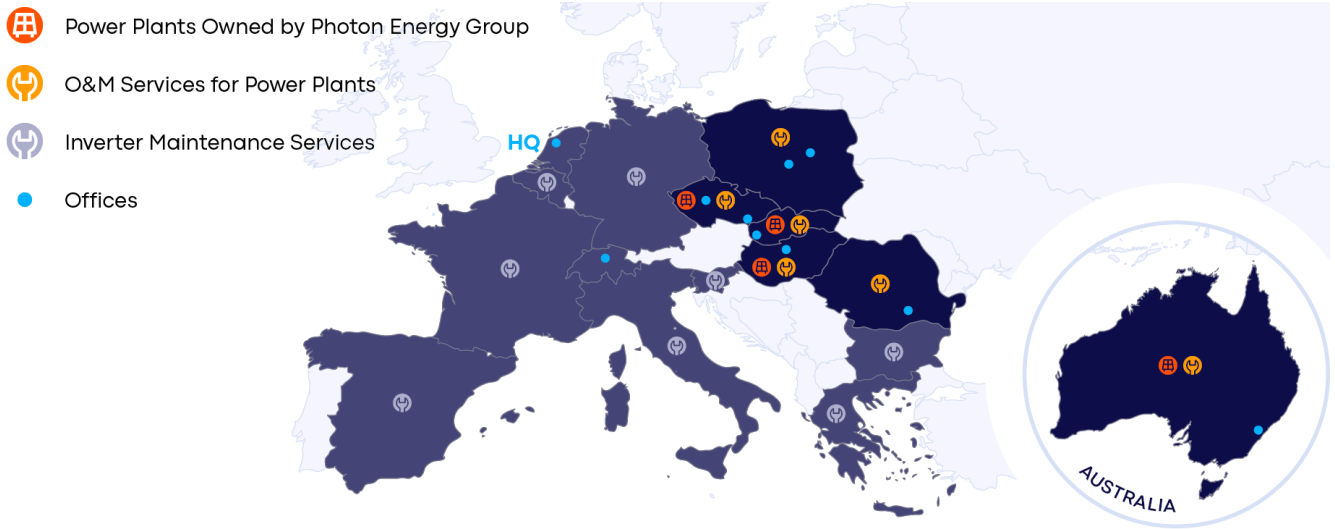

- ▶ **Technology:** Trading of PV-components (modules, inverters and batteries).
- ▶ **Investments (Electricity Generation):** Investments in PV power plants and sustainable production and sale of electricity.
- ▶ **Operations:** Operations and maintenance of PV power plants, including a proprietary control room and monitoring platform.

In addition, the company launched a new service line **Water** which offers comprehensive services in the fields of contaminated land and ground water remediation and water purification.

Country-specific references

Currently Photon Energy is active with 176 professionals in nine countries across three continents (headquartered in Amsterdam), with a track record of building more than 110 MWp of grid-connected PV plants across five countries, a proprietary portfolio of

91.9 MWp of PV plants and around 327 MWp of PV power plants under O&M management across two continents.

8. Implementation of innovative activities in the Company

None during the reporting period.

9. Employees

As of the end of Q2 2022, Photon Energy had 176 employees (compared to 145 employees at the end of Q2 2021) translating into 171.5 FTE (compared to 142.3 FTE as of the end of Q2 2021).

Chart 11. Total number of employees and full-time equivalent employees per quarter

Full-time equivalent (FTE) is a unit that indicates the workload of a person in a way that makes workloads comparable across various contexts. An FTE of 1.0 means that the person is equivalent to a full-time employee, while an FTE of 0.5 signals that the employee is only half-time.

Employee Share Purchase Programme

The management of the Company recognises the significant contribution of the team members to the future development of the Group. Therefore, it operates an Employee Share Purchase Programme as a part of its motivation system. Under the terms of the programme, the Group periodically purchases shares for participating employees equal to 10% of their gross compensation.

The disposition rights to these shares are limited and employees can dispose of these shares only under specific conditions.

10. Group structure

The following table presents the Group's structure (subsidiaries and joint ventures) and the holding company's stake in the entities comprising the Group as of the reporting date.

Photon Energy Operations CZ s.r.o. established a branch office in Romania.

PEP & PEECZ – Photon Energy Projects s.r.o. owns 95% and Photon Energy Solution s.r.o. owns 5%

In the reporting period, the following changes to the Group structure took place:

- ▶ On 6 April 2022, Photon Energy Solutions s.r.o. was renamed to Photon Energy Engineering s.r.o..
- ▶ On 27 April 2022, Photon SPV 1 s.r.o. was renamed to Photon Energy Solutions CZ s.r.o.
- ▶ On 24 May 2022, Solar Age Polska S.A. was renamed to Photon Energy Solutions PL S.A..
- ▶ On 10 June 2022, Photon Energy N.V. became 100% shareholder of Photon Energy Solutions AG.
- ▶ On 10 June 2022, Photon Energy N.V. became 100% shareholder of Photon Property AG.

After the reporting period, the following events occurred from the beginning of July 2022

- ▶ On 1 July 2022, Photon Energy Solutions CZ s.r.o. successfully changed its name (and legal form) to Photon Energy Solutions CZ a.s..

11. Report on the key events material for the Group's operations

11.1 Summary of the key events from 1 April until 30 June 2022

In the period covered by this report the following current reports were published in the EBI (Electronic Database Information) system of Warsaw Stock Exchange:

- ▶ **EBI report 1** - 11.04.2022 - Report on the scope of compliance with the WSE Best Practice

In the period covered by this report the following current reports were published in the ESPI (Electronic Information Transmission System) system of Warsaw Stock Exchange:

- ▶ **ESPI report 9** - 11.04.2022 - Photon Energy Group publishes 2021 Annual report and Sustainability report.
- ▶ **ESPI report 10** - 13.04.2022 - Monthly report for March 2022.
- ▶ **ESPI report 11** - 19.04.2022 - Photon Energy Group provides full year 2022 guidance.
- ▶ **ESPI report 12** - 20.04.2022 - Convocation of the Annual General Meeting of shareholders on 31 May 2022
- ▶ **ESPI report 13** - 05.05.2022 - Change in substantial blocks of Shares.
- ▶ **ESPI report 14** - 05.05.2022 - Photon Energy Group expands its IPP portfolio to 92 MWp.
- ▶ **ESPI report 15** - 10.05.2022 - Photon Energy Group considers tapping its outstanding 6.50% Green EUR Bond 2021/2027.

Notes to the Interim Consolidated Financial Statements

For the Period of 6 Months ended 30 June 2022

1. Reporting Entity

Photon Energy N.V. ("Photon Energy" or the "Company"), ID 51447126, is a joint-stock company incorporated under the laws of Netherlands on 9 December 2010.

The Group is engaged in the development of photovoltaic power plants. This activity involves securing suitable sites by purchase or long-term lease, obtaining all licenses and permits, the design,

installation of photovoltaic equipment, financing, operations and maintenance. Photon Energy pursues a comprehensive strategy of focusing both on green-field and rooftop installations while trying to cover the largest possible part of the value chain and lifecycle of the power plant. In addition, the Group launched a new service line Water which offers comprehensive services in the fields of contaminated land and ground water remediation and water purification.

2. Basis of Preparation

2.1 Basis of Preparation and Statement of Compliance with IFRS

The Interim Consolidated Financial Statements are for the six months ended 30 June 2022 and are presented in EUR. The functional currencies used in the Group are CZK for Czech subsidiaries, EUR for Dutch, German and Slovak companies, CHF for Swiss subsidiary, HUF for Hungarian entities, AUD for Australian subsidiaries, ROM for Romanian entities and PLN for Polish entities. All financial information presented in EUR has been rounded to the nearest thousand.

The Interim Consolidated Financial Statements have been prepared in accordance with IAS 34 'Interim Financial Reporting'. They do not include all of the information required in annual financial statements in accordance with IFRS, and should be read in conjunction with the consolidated financial statements for the year ended 31 December 2021.

Photon Energy N.V. is the Group's ultimate parent company. It is a limited liability company incorporated and domiciled in Netherlands. The address of its registered office and principal place of business is Barbara Strozilaan 201, 1083HN Amsterdam, Netherlands. Photon Energy NV's shares are listed on the regulated

markets of the Warsaw and Prague Stock Exchanges, as well as on the Quotation Board of the Frankfurt Stock Exchange. Trading of the shares on regulated markets on the Warsaw Stock Exchange and Prague Stock Exchange commenced on 5 January 2021. Trading of the Company's shares on the Quotation Board of the Open Market of the Frankfurt Stock Exchange (FSX) commenced on 11 January 2021. The listings did not involve any issuance of new shares.

The bond is traded on the Open Market of the Frankfurt Stock exchange, and on the stock exchanges in Berlin, Hamburg, Hannover, Munich and Stuttgart.

The Interim Financial Statements were approved for issue by the Board of Directors on 11 August 2022.

The Interim Consolidated Financial Statements are unaudited.

Going Concern

In preparing these accounts on a going concern basis, management used its best estimates to forecast cash movements over the next 12 months from the date of these interim accounts. As per today, management believes the Company will be able to repay its liabilities and ensure the further development of the Group.

3. Application of New and Revised EU IFRSs

3.1 New Standards Adopted at 1 January 2022

There are no accounting pronouncements which have become effective from 1 January 2022 that have a significant impact on the Group's interim consolidated financial statements.

4. Significant Accounting Policies

The Interim Financial Statements have been prepared in accordance with the accounting policies adopted in the Group's most recent annual financial statements for the year ended 31 December 2021.

5. Estimates and Judgements

When preparing the Interim Consolidated Financial Statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management, and will seldom equal the estimated results.

The judgements, estimates and assumptions applied in the Interim Consolidated Financial Statements, including the key sources of

estimation uncertainty, were the same as those applied in the Group's last annual consolidated financial statements for the year ended 31 December 2021, except for following changes:

As of 1 January 2022, the Company prolonged estimated useful lives for the calculation of depreciation of powerplants operating in Slovakia, Czech Republic and Hungary to 25 years. Those prolonged estimated useful lives are in line with Company's intentions to operate these assets for extended period. As the change in

estimated useful live represent change in estimate, it has been adopted prospectively and no restatement of prior year periods has been done.

Estimate of income tax liabilities determined in the Interim Financial Statements are using the estimated average annual effective income tax rate applied to the pre-tax income of the interim period.

6. Significant Events and Transactions

6.1 Establishment of New Subsidiaries

During first 6 months of 2022, Photon Energy N.V. (directly or via its subsidiaries) incorporated the following subsidiaries:

- ▶ On 28 February 2022, Photon Energy projects became 95% shareholder and Photon Energy Solutions CZ became 5% shareholder Kenton Solar Srl., Lancaster Solar Srl., and Perivale Solar Srl.
- ▶ On 7 March 2022, Photon Energy projects became 95% shareholder and Photon Energy Solutions CZ became 5% shareholder of Weston Solar Srl. and Harlow Solar Srl.
- ▶ On 14 March 2022, Photon Energy Projects s.r.o. became 95% shareholder and Photon Energy Solutions CZ became 5% shareholder of Brentford Solar Srl., Camberwell Solar Srl., Romford Solar Srl., and Stratford Solar Srl., Romania.
- ▶ On 18 March 2022, Photon Energy N.V. became 95% shareholder and Photon Energy Projects s.r.o. became 5% shareholder of Photon Energy Engineering Romania SRL. Romania.
- ▶ On 10 June 2022, Photon Energy N.V. became 100% shareholder of Photon Energy Solutions AG, and Photon Property AG, Switzerland.

6.2 Acquisition of New Subsidiaries and Associates

- ▶ On 17 January 2022, KORADOL AG became 100% shareholder of Photon SPV 3 s.r.o., Photon SPV 4 s.r.o., Photon SPV 6 s.r.o., Photon SPV 8 s.r.o., Photon SPV 10 s.r.o., Exit 90 SPV s.r.o., Onyx Energy s.r.o., Onyx Energy projekt II s.r.o., and Kaliopé Property s.r.o., Czech Republic.

As the Group had already significant control over these entities, these acquisitions were considered to be transactions under common control and had no impact to consolidated accounts.

- ▶ On 10 February 2022, ALFEMO AG became 90% shareholder and KORADOL AG became 10% shareholder of Siria Solar Srl. No goodwill has been recognized at acquisition.

6.3 Other Developments in H1 2022

- ▶ On 7 February 2022, Photon Energy NV. acquired (new series D shares have been registered by the court) additional almost 12% of Lerta S.A., Poland
- ▶ On 22 March 2022, PE Solar Technology Ltd. was dissolved
- ▶ On 6 April 2022, Photon Energy Solutions s.r.o. was renamed to Photon Energy Engineering s.r.o.
- ▶ On 27 April 2022, Photon SPV 1 s.r.o. was renamed to Photon Energy Solutions CZ s.r.o.,

- ▶ On 1 July 2022, Photon Energy Solutions CZ s.r.o. changed its legal form to Photon Energy Solutions CZ a.s.

- ▶ On 24 May 2022, Solar Age Polska S.A. was renamed to Photon Energy Solutions PL S.A.

There were no other changes in the group structure during six months period to 30 June 2022.

6.4 Financial Information for the Joint Ventures and Associates

Joint ventures

Total investments in equity-accounted investees amounting to EUR 4,850 thousand (31 December 2021: EUR 1,626 thousand) represent the share in the joint ventures owned by the Group of EUR 1,768 thousand (31 December 2021: EUR 1,626 thousand) and investment in associates of EUR 3,082 thousand (31 December 2021: EUR 0)

Associates

Following the execution of the convertible loan agreement, 2,500,000 newly issued shares (representing additional 12%) of Lerta S.A. were registered on 7 February 2022. Total number of shares of Lerta S.A. held by Photon Energy N.V. amounts to 4,129,728 and represents 23.98% share.

Following the registration of new shares and the fact, that the Group obtained significant influence, but not control, over the financial and operating policies, the investment was reclassified into Investments in equity-accounted investments and the Group recognises its share of the profit or loss and other comprehensive income (from the date that significant influence has been obtained) in Statement of Comprehensive Income.

Disposals in H1 2022

There were no disposals of investments during H1 of 2022.

Disposals in 2021

In April 2021, the Group announced an agreement to exchange project rights with its development partner Canadian Solar. As a result, Photon Energy will continue developing the 160 MWp Maryvale Solar Farm independently, while further development of the Gunning Solar Farm and the Suntop2 Solar Farm will be handled by Canadian Solar. Of the three projects, Maryvale is in the furthest stages of development.

Under the terms of the agreement, Photon Energy has exchanged its 49% stake in the 220 MWp Gunning Solar Farm and 25% stake in the 200 MWp Suntop2 Solar Farm for Canadian Solar's stake in the Maryvale Solar Farm. The Group now possesses a 65% stake in the Maryvale Solar Farm and will work with its original local co-development partner (which owns the remaining 35% stake) to undertake preliminary design and grid connection studies, followed by a connection agreement which is expected to be reached within 12 months.

Overall result from the disposal amounted to loss of EUR 79 thousand.

7. Segment Reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues or incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating segments' operating results are reviewed regularly by the Group's management and Board of directors to make decisions about resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available. The chief operating decision maker (CODM) has been identified as the Board of Directors and the CFO of the Group.

The Board of Directors identified the following segments to be reported:

- ▶ **Solutions:** Development, engineering and construction services of turn-key photovoltaic systems' installations for external clients and Photon Energy). This segment was formerly named Energy Solutions and included as well wholesale of technology, which became due to its size an own reportable segment. Further activities of project development were taken out of this segment and are reported now under "Others", since the nature of the activity changed from purely internal development for our own projects to project development for external partners,
- ▶ **Technology:** Wholesale, import and export of FVE components,
- ▶ **Investments (Electricity Generation):** Investment into photovoltaic power plants and generation of revenues from production of electricity (this segment includes SPV that finished building of photovoltaic power plants and those that are connected to the distribution network and produce electricity). Previously this segment was split into "Production of Electricity" and "PV Investments" as those income is generated by the same assets,
- ▶ **Operations & Maintenance:** Operations, maintenance and PVPP supervision. This segment includes also the services of Inverter Cardio and Monitoring and Control,
- ▶ **Other segments:** Other, not related to any of the above mentioned segments. Others include project development, water technology and remediation services and other less significant activities. None of these activities meets any of the quantitative thresholds for determining reportable segments in neither 2022 nor 2021.

Segment results that are reported include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Interest income, interest expense and income tax charges are allocated directly to the segments. Segment capital expenditure is the total cost incurred during the reporting period to acquire property, plant and equipment, and intangible assets other than goodwill.

Factors that Management Used to Identify the Reportable Segments

The Group's segments are strategic business units that focus on different business activities. They are managed separately because each business unit requires different processes.

Measurement of Operating Segment Profit or Loss, Assets and Liabilities

The Group's management and directors review financial information prepared based on IFRS as adopted by EU adjusted to meet the requirements of internal reporting. The financial information does not differ from IFRS as adopted by EU.

The Group's management and directors evaluate the segments based on total comprehensive income which is considered to be the key measure.

During the six month period to 30 June 2022, there have been no changes from prior periods in the measurement methods used to determine operating segments and reported segment profit or loss.

The revenues and profit generated by each of the Group's operating segments and segment assets and liabilities are summarised as follows:

Operating segments for the period from 1 January 2022 to 30 June 2022

<i>In thousands of EUR</i>	Solutions	Technology	Investments	Operations and Maintenance	Other	Total for segments before elimination	Elimination	Consolidated financial information
External revenues from the sale of products, goods & services	1,458	13,507	15,913	1,294	195	32,367	0	32,367

Additions to non-current assets	-	-	3,587	-	-	3,587	-	3,587

7. Operating Segments (Continued)

All the operational segments are managed on an international basis (not on a country level). In H1 2022 and H1 2021 the Group operated in the Czech Republic, Slovak Republic, Germany, Hungary, Australia, Switzerland, Romania, Poland and the Netherlands with headquarters in the Netherlands.

In first 6 months of 2022 and in 2021, revenues were generated in all above mentioned markets, except of the Netherlands, Romania, Poland and Peru. Non-current assets (power plants) are located in the Czech Republic, Slovak Republic, Hungary and Australia.

For the booking of transactions between the segments, the same rules for the recognition are applied as for the third parties.

Major Customer

The Group has many customers. For the companies selling electricity, there is usually only one distribution company, which buys produced electricity. These local electricity distributors further deliver and resell electricity to final customers. Distributors are obliged to purchase all of the electricity production for the price based on Feed in Tariff prices or market prices. The Group as such is not dependent on any individual customer.

Revenues from customers over 10% of total revenues

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
Lerta Energy HU Kft.(including CZ branch)	2,869	
E.ON Energie, a.s.	-*	3,077
MAVIR Zrt.	-*	2,025
Total revenue from customers over 10% of total revenues	2,869	5,102
Total revenue from customers	26,757	13,039
Total revenue	32,367	14,425

*did not exceed 10% of total revenues

The Czech SPVs producing electricity opted for the green bonus support for 2022 which is paid by OTE, a.s. ("OTE" Czech electricity market operator). In 2021, no green bonus was paid by OTE as the produced electricity was sold directly to the E.ON Energie, a.s. for the fixed feed in tariff. In 2022 in addition, the Czech SPVs sold the produced electricity to Solar Global Energy a.s. and Lerta Energy HU Kft at market prices. Total revenues from sale of electricity to Solar Global Energy a.s. did not exceed 10% of total revenues from customers.

Revenues from OTE, a.s. of EUR 5,327 thousand in 6 months to 30 June 2022 (6 months to 30 June 2021: EUR 0) do not represent revenues from customers and represent green bonus received for produced electricity by Czech SPVs.

Revenues from Lerta Energy HU Kft, E.ON Energie, a.s. and MAVIR Zrt. are presented in the Segment Investments in 2021 and represent revenues from sale of electricity from various PVPs.

8. Revenue

The Group derives revenue from the transfer of goods and services at a point in time and over time in the following major product lines and geographical regions:

Timing of revenues:

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
At a point of time	13,507	1,845
Over time	13,250	11,194
Total revenue from contracts with customers	26,757	13,039
Compensations for sales from electricity generation (OTE and OKTE)	5,610	1,386
Total revenue	32,367	14,425

Revenues by major revenue types:

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
Sale of electricity	10,303	8,442
Revenues from EPC contracts	1,458	1,391
Sale of goods and technologies	13,507	1,845
Rendering of services	1,489	1,361
Total revenue from contracts with customers	26,757	13,039
Compensations for sales from electricity generation	5,610	1,386
Total revenue	32,367	14,425

The Group uses various revenue models for PVP generating revenues from sale of electricity – fixed feed in tariffs, contracts for difference, and the merchant model.

In 2022, Czech SPVs opted for the green bonus scheme, under which produced electricity is sold to the distributors at market price and a green bonus set as fixed amount per MWh produced is received from OTE.

During 2022, some of the Hungarian SPVs opted out from KAT/Metar fixed feed in tariffs and are also selling produced electricity to electricity traders at market price.

As the Group operates in regulated business under various models for PVP revenues from sales of electricity, the Group invoices the

revenues from sale of electricity to different partners, including government agencies which in fact does not receive any generated electricity, such as the short-term electricity market operator OKTE, a.s. ("OKTE") in Slovakia and OTE, a.s in Czech Republic. Total amount of compensations for sales from electricity generation invoiced to OKTE and OTE in first half of 2022 amounted to EUR 5,610 thousand (H1 of 2021: EUR 1,386 thousand).

Even though the revenues were invoiced in 2022 and 2021 to government agency, the Group does not consider them to be government grants and recognised them as revenues from sale of electricity as these revenues are representing core activity of the Group and are clearly linked to revenue model that is determined for each PVP.

Revenues by geographical split:

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
Czech Republic	17,534	8,071
Slovak Republic	1,184	303
Australia	1,144	1,134
Germany	574	-
Hungary	6,321	3,531
Other	-	-
Total revenue from contracts with customers	26,757	13,039
Compensations for sales from electricity generation – Czech Republic and Slovakia	5,610	1,386
Total revenue	32,367	14,425

Poland	3,936	3,670
Romania	4,289	1,178
Total	140,667	142,463

Note: (i) Non-current assets presented consist mainly of property, plant and equipment (lands, photovoltaic power plants, other equipment, and assets under construction), and assets in progress.

Revalued amount of EUR 119,168 thousand as at 30 June 2022 (31 December 2021: EUR 123,434 thousand) includes net carrying amount of photovoltaic power plants and value of land connected to the photovoltaic power plants of EUR 5,223 thousand as at 30 June 2021 (31 December 2021: EUR 5,169 thousand) which are included under Land.

During H1 2022, the Group performed revaluation of a newly connected power plant in Hungary resulting in an increase of the value of property, plant, and equipment by EUR 433 thousand, including the impact of deferred tax.

During H1 2021, the Group did not perform any revaluation of newly connected or already connected powerplants.

Property, plant and equipment under construction

Property, plant and equipment under construction equaled to the amount of EUR 4,980 thousand (31 December 2021: EUR 3,052 thousand) comprising mainly of power plants under construction in Hungary and Romania (H1 2021: Australia).

Sale of property, plant and equipment

There were no sales of property, plant, and equipment in H1 2022 nor 1H 2021.

10. Other Financial Investments

Other non-current investments include following investments:

<i>In thousands of EUR</i>	30 June 2022	31 December 2021
Other financial investments		
Other financial assets at FVTPL	1,612	1,242
Other financial assets at FVOCI	5,354	8,494
Total non-current financial assets	6,966	9,736

The table below discloses investments in equity securities at 30 June 2022 by measurement categories and classes:

<i>In thousands of EUR</i>	Other financial assets at FVTPL	Other financial assets at FVOCI	Total
Other financial investments			
Corporate shares	-	5,355	5,355
Share options (note 16)	1,611	-	1,611
Total Other financial investments at 31 December 2021	1,611	5,355	6,966

The table below discloses investments in equity securities at 31 December 2021 by measurement categories and classes:

<i>In thousands of EUR</i>	Other financial assets at FVTPL	Other financial assets at FVOCI	Total
Other financial investments			
Corporate shares	-	6,759	6,759
Share options	1,242	-	1,242
Shares not yet registered	-	1,735	1,735
Total Other financial investments at 31 December 2021	1,242	8,494	9,736

(a) Other financial assets at FVOCI – Corporate shares

At 30 June 2022, the Group designated investments disclosed in the following table as equity securities at FVOCI. The FVOCI designation was made because the investments are expected to be

held for strategic purposes rather than with a view to profit on a subsequent sale, and there are no plans to dispose of these investments in the short or medium term.

<i>In thousands of EUR</i>	Fair value at 30 June 2022	Dividend income recognised for the period H1 2022
Other financial assets at FVOCI		
Investment in Raygen Resources Pty Ltd ordinary shares	3,434	0
Investment in Raygen Resources Pty Ltd preference shares	1,921	0
Total Other financial assets at FVOCI	5,355	0

At 31 December 2021, the Group designated investments disclosed in the following table as equity securities at FVOCI. The FVOCI designation was made because the investments are

expected to be held for strategic purposes rather than with a view to profit on a subsequent sale, and there are no plans to dispose of these investments in the short or medium term.

<i>In thousands of EUR</i>	Fair value at 31 December 2021	Dividend income recognised for the period H1 2021
Other financial assets at FVOCI		
Investment in Raygen Resources Pty Ltd ordinary shares	3,434	0
Investment in Raygen Resources Pty Ltd preference shares	1,921	0
Investment in Lerta SA ordinary shares	1,404	0
Shares not yet registered (Lerta SA)	1,735	0
Total Other financial assets at FVOCI	8,494	0

At 30 June 2022 and 31 December 2021 securities at FVOCI include equity securities which are not publicly traded. Due to the nature of the local financial markets, it is not possible to obtain current market value for these investments. For these investments,

fair value is estimated by reference to subscription value of additional shares placed.

Reconciliation of movements in Other financial assets at FVOCI follows:

<i>In thousands of EUR</i>	Investment in Raygen Resources Pty Ltd	Investment in Lerta SA	Total
Other financial assets at FVOCI as at 1 January 2021	1,138	904	2,042
Additional investments in other financial assets at cost	1,897	163	2,060
Revaluation recognised in OCI	2,320	337	2,657
Shares not yet registered	0	1,735	1,735
Other financial assets at FVOCI as at 31 December 2021	5,355	3,139	8,494
Derecognition of FVOCI investment, recognition in Investments in equity accounted investments	0	-3,139	-3,139
Revaluation recognised in OCI	0	0	0
Other financial assets at FVOCI as at 30 June 2022	5,355	0	5,355

During H1 2022 the Group did not acquire any additional shares of Raygen Resources Pty Ltd.

Following the execution of the convertible loan agreement, 2,500,000 newly issued shares (representing additional 12%) of Lerta S.A. were registered on 7 February 2022. Total number of shares of Lerta S.A. held by Photon Energy N.V. amounts to 4,129,728 and represents 23.98% share.

Following the registration of new shares and the fact, that the Group obtained significant influence, but not control, over the financial and operating policies, the investment was reclassified into Investments in equity-accounted investments and the Group recognises its share of the profit or loss and other comprehensive income (from the date that significant influence has been obtained) in Statement of Comprehensive Income.

11. Assets and Liabilities Arising from Contracts with Customers

The Group has recognised following assets and liabilities arising from contracts with customers:

<i>In thousands of EUR</i>	30 June 2022	31 December 2021
Current contract assets from contracts with customers	978	1,131
Loss allowance	0	0
Total current contract assets	978	1,131
Contract liabilities – advances from customers	907	423
Total current contract liabilities	907	423

Contract assets represents un-invoiced part of recognised revenue based on progress towards complete satisfaction. Invoiced amount of contract assets is reclassified to trade receivable upon its invoicing.

At 30 June 2022 the most significant part of the contract asset was represented by North East Water project in Australia of EUR 921 thousand (31 December 2021: EUR 753 thousand).

12. Liquid Assets

For the purposes of the consolidated statement of cash flows, cash and cash equivalents include cash on hand and at banks. Cash and cash equivalents at the end of the reporting period as shown

in the consolidated statement of cash flows can be reconciled to the related items in the consolidated statement of financial position as follows:

<i>In thousands of EUR</i>	30 June 2022	31 December 2021
Cash and cash equivalents	20,499	32,506
Cash with restriction on disposition	5,256	3,629
Precious metals	3,755	3,227
Liquid assets	29,510	39,362

Cash with restriction on disposition includes mainly DSRA (debt service reserve accounts) and MRA (maintenance reserve accounts) for Slovak, Hungarian and Australian SPVs and guarantees issued.

Part of the movement on Cash with restriction on disposition related to operating activities of the Group in H1 of 2022 of EUR 30

thousand (H1 of 2021: EUR 80 thousand) was presented as Change in trade and other receivables. Movement in Cash with restriction on disposition relating to borrowings in H1 2022 of EUR 1,657 thousand (H1 2021: EUR 320 thousand) was presented in Cash flows from financing activities.

13. Capital and Reserves

Share capital and share premium

Ordinary shares

<i>In shares</i>	30 June 2022	31 December 2021
On issue at 1 January	60,000,000	60,000,000
On issue at 31 December – fully paid	60,000,000	60,000,000

The Company's issued share capital is EUR 600,000 divided into 60,000,000 shares with a nominal value of EUR 0.01 each. The share capital is fully paid-up.

Ordinary shares

All shares rank equally with regard to the Company's residual assets.

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at the shareholders' meetings of the Company.

Treasury shares

At 30 June 2022 treasury shares included 3,708,258 ordinary shares of the Company (31 December 2021: 3,747,635 ordinary shares) owned directly by the Company. These ordinary shares carry no voting rights at the Shareholders Meeting.

Share premium represents the excess of contributions received over the nominal value of shares issued. Proceeds from allocation of treasury shares to employees in excess to nominal value of shares are also recorded in Share premium. Nominal value of sold treasury shares is recorded against Treasury shares reserve.

Movement in share capital can be analysed as follows:

<i>In thousands of EUR</i>	Ordinary shares	Share premium	Treasury shares	Total
At 1 January 2022	600	31,443	-38	32,005
Treasury shares allocated to employees	-	82	-	82
Treasury share acquired from the market	-	-	-20	-20
At 30 June 2022	600	31,526	-58	32,067

<i>In thousands of EUR</i>	Ordinary shares	Share premium	Treasury shares	Total
At 1 January 2021	600	23,946	-87	24,459
Treasury shares allocated to employees	0	173	0	173
Treasury shares allocated to qualified investors	0	7,324	49	7,373
At 31 December 2021	600	31,443	-38	32,005

As of 30 June 2022 the shareholder structure was as follows:

Shareholder	No. of shares	% of capital	No. of votes at Shareholders Meeting	% of votes at Shareholders Meeting
Solar Future Cooperatief U.A.	21,775,075	36,29%	21,775,075	38,68%
Solar Power to the People Cooperatief U.A.	20,843,375	34,74%	20,843,375	37,03%
Photon Energy N.V.	3,708,258	6,18%	0	0,00%
Free float	13,673,292	22,79%	13,673,292	24,29%
Total	60,000,000	100,00%	56,234,335	100,00%

As of 31 December 2021 the shareholder structure was as follows:

Shareholder	No. of shares	% of capital	No. of votes at Shareholders Meeting	% of votes at Shareholders Meeting
Solar Future Cooperatief U.A.	21,775,075	36,29%	21,775,075	38,71%
Solar Power to the People Cooperatief U.A.	20,843,375	34,74%	20,843,375	37,05%
Photon Energy N.V.	3,747,635	6,25%	0	0,00%
Free float	13,633,915	22,72%	13,633,915	24,24%
Total	60,000,000	100,00%	56,252,365	100,00%

Mr. Michael Gartner and Mr. Georg Hotar are the only members of the Company's Board of Directors.

Mr. Michael Gartner indirectly owns 38.68 % (31 December 2021: 38.71 %) of the votes, via Solar Future Cooperative U.A. and directly 0.04% (31 December 2021: 0.04 %) of votes at the Shareholders Meeting. Mr. Georg Hotar indirectly owns 37.03 % (31 December 2021: 37.05 %) of votes, via Solar Power to the People Coöperatief U.A. and directly 0.14% (31 December 2021: 0.18%) of votes at the Shareholders Meeting.

The Free float includes shares allocated to the employee share purchase programme. The disposition rights to these shares are limited and employees can dispose of these shares only under specific conditions.

The other reserves relate to the legal reserve; the revaluation of property, plant and equipment – photovoltaic power plants the hedging reserve and the currency translation reserve

Movement in Other reserves can be analysed as follows:

<i>In thousands of EUR</i>	30 June 2022	31 December 2021
Statutory reserve fund	13	13
Revaluation reserve	39,252	40,251
Currency translation reserve	1,490	2,021
Hedging reserve	3,933	2,039
Other capital funds	38	38
Total reserves	44,728	44,362

Revaluation reserve

<i>In thousands of EUR</i>	Revaluation reserve – PPE	Revaluation reserve – Other financial investments	Revaluation reserve total
Balance as at 1 January 2021	40,680	0	40,680
Increase of revaluation reserve (Note 9)	1,181	2,657	3,838
Increase of revaluation reserve - DT recognised	-548	0	-548
Share on increase on revaluation of properties - JV	105	0	105
Move from revaluation reserve to retained earnings	-3,822	0	-3,822
Other movements	-2	0	-2
Balance as at 31 December 2021	37,594	2,657	40,251
Increase of revaluation reserve (Note 9)	475	0	475
Increase of revaluation reserve - DT recognised	-42	0	-42
Share on increase on revaluation of properties - JV	0	0	0
Move from revaluation reserve to retained earnings	-1,431	0	-1,431
Other movements	-1	0	-1
Balance as at 30 June 2022	36,595	2,657	39,252

The revaluation reserve arises on the revaluation of photovoltaic power plants (PVP).

In H1 2022, the Group performed revaluations of the newly connected power plant in Hungary resulting in an increase of the value of property, plant, and equipment by the total amount of EUR 475 thousand, net amount recognised in revaluation reserve resulting from this amounted to EUR 433 thousand, see also note 9.

The revaluation reserve is being released to the retained earnings during the duration of the expected useful life (as of 1 January 2022

prolonged to 25 years for Slovakia, Czech Republic and Hungary (see also Note 5) and Australia 30 years).

The amount equal to the amount of depreciation coming from revaluation recycled to retained earnings in H1 2022 equals to EUR 1,431 thousand (1H 2021: EUR 3,822 thousand).

The revaluation reserve as such cannot be distributed only the amounts released to retained earnings can be distributed to the shareholder.

Foreign currency translation reserve

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
Balance at beginning of period	2,021	-2,579
Foreign currency differences arising from the translation of financial statements and foreign exchange gains or losses arising from net investments	-531	3,814
Balance at end of period	1,490	1,234

The foreign currency translation reserve comprises all foreign currency differences arising from the translation of the financial statements of operations using different currency from Euro. It relates to Czech Republic, Hungary, Poland, Romania, Switzerland and Australia.

In accordance with accounting policies are foreign exchange gains or losses arising from net investments in foreign operations also recognised in other comprehensive income.

This reserve cannot be distributed.

Derivatives hedging reserve

<i>In thousands of EUR</i>	6 months to 30 June 2022	6 months to 30 June 2021
Balance at beginning of period	2,039	-325
Change in fair value of hedging derivatives – fully consolidated entities (net of deferred tax)	1,885	972
Share on change in fair value of hedging derivatives of JV	9	23
Balance at end of period	3,933	670

Derivatives hedging reserve cannot be distributed.

14. Earnings Per Share

<i>In EUR</i>	H1 2022	H1 2021
Basic earnings per share	0.010	-0.076
Diluted earnings per share	0.010	-0.066
Total comprehensive income per share		
Basic TCI per share	0.042	0.045
Diluted TCI per share	0.040	0.040

Basic and diluted earnings per share

The calculation of basic earnings per share for H1 of 2022 was based on the profit attributable to ordinary shareholders of EUR - 575 thousand and weighted average number of ordinary shares outstanding of 56,277 thousand (H1 2021: 52,480 thousand).

Share on profit of equity-accounted investees for H1 2022 amounted to EUR 36 thousand (H1 2021: EUR 74 thousand).

Basic and diluted total comprehensive income per share

The calculation of total comprehensive earnings per share and diluted total comprehensive earnings per share H1 of 2022 and H1 2021 was based on the total comprehensive income of EUR 2,371 thousand (H1 2021: EUR 2,371 thousand) attributable to ordinary shareholders and a weighted average number of ordinary shares outstanding of 56,277 thousand ((H1 2021: 52,480 thousand).

Weighted average number of ordinary shares

There were no new shares issued in H1 2022 nor 2021. The number of shares at the year-end 2021 was 60,000,000.

15. Loans and Borrowings

This note provides information about the contractual terms of the Group's interest-bearing loans and borrowings, which are measured at amortised cost.

<i>In thousands of EUR</i>	30 June 2022	31 December 2021
Non-current loans and borrowings		
Issued bonds	67,204	57,223
Long-term secured bank loans	34,988	41,106
Long term lease liability	1,960	1,676
Long-term portion of other loans	290	373
Total non-current loans and borrowings	104,441	100,378
Current loans and borrowings		
Issued bonds	23,026	24,107
Current portion of long-term secured bank loans, including accrued interest	4,769	4,354
Short-term lease liability	580	597
Total current loans and borrowings	28,374	29,058
Total loans and borrowings	132,816	129,436

Reconciliation of liabilities arising from financing activities

The table below sets out an analysis of liabilities from financing activities and the movements in the Group's liabilities from financing activities for each of the periods presented. The items of these liabilities are those that are reported as financing in the statement of cash flows:

<i>In thousands of EUR</i>	Borrowings	Issued bonds	Lease liabilities	Other liabilities from financing activities	Total
Liabilities from financing activities at 1 January 2022	45,460	81,330	2,273	373	129,436
Cash flows					
Loan drawdowns/New issues of bonds	-	10,000	-	-	10,000
Repayments of principal	-3,609	-1,310	-310	-83	-5,312
Interest payments	-1,131	-2,843	-41	-13	-4,028
Non-cash changes					
New leasing contracts	-	-	512	-	512
Interest expense	1,131	3,107	41	13	4,292
Foreign exchange adjustments	-2,095	-54	64	-	-2,085
Liabilities from financing activities at 30 June 2022	39,756	90,230	2,539	290	132,816

Repayments of loan principal of EUR 3,609 thousand in first half of 2022 (1H 2021: EUR 4,887 thousand) include regular repayments of loans provided in EUR, HUF and AUD of EUR 1,419 thousand and extraordinary repayment of loan of CIB loan for Ladany Solar

Delta of EUR 2,190 thousand (1H 2021: regular repayment of EUR 3,990 thousand and extraordinary repayment of Infradebt loan of EUR 897 thousand (AUD 1,250 thousand).

<i>In thousands of EUR</i>	Borrowings	Issued bonds	Lease liabilities	Other liabilities from financing activities	Total
Liabilities from financing activities at 1 January 2021	50,151	46,739	2,405	401	99,696
Cash flows					
Loan drawdowns/New issues of bonds	15,416	761	-	167	16,344

Foreign exchange adjustments	1,015	57	19	-	1,091
Liabilities from financing activities at 30 June 2021	61,173	47,759	2,230	568	111,730

Terms and debt repayment schedule

Terms and conditions of outstanding loans were as follows:

<i>In thousands of EUR</i>	Currency	Nominal interest rate	Year of maturity	30 June 2022		31 December 2021	
				Credit limit	Utilised	Credit limit	Utilised
Secured bank loan (Unicredit)	EUR	3M EURIBOR + 1.55%	30.6.26-30.9.27	4,232	4,232	4,759	4,759
Secured bank loan (K&H)	HUF	3M BUBOR + 2.2–2.5%	28.6.2034 31.3.2035	20,694	19,767	22,643	21,629
Secured bank loan (CIB)	HUF	3M BUBOR + 2.5%	31.12.2035	10,974	10,974	14,415	14,415
Secured bank loan (Infradebt)	AUD	3M BBSW (min 0,5%) + 2,35-3,25%	31.12.2025	4,508	4,508	4,618	4,618
Accrued fees and interest					276	0	40
Total interest bearing loans				40,408	39,756	46,434	45,460

Issued bonds

<i>In thousands of EUR</i>	Amortised amount		Fair value	
	30 June 2022	2021	30 June 2022	2021
Current liabilities				
EUR bond 2017/22	22,721	23,735	22,721	24,350
Non-current liabilities				
Green bond 2021/27	64,491	54,602	65,088	57,201
CZK bond 2016/23	3,018	2,993	3,051	2,832
Total	90,230	81,330	90,861	84,383

During 1H 2022 the Company issued additional EUR green bond in nominal value of 10,000,000 under the existing program. Total amount of placement costs paid for the issuance of additional green bonds in 1H 2022 amounted to EUR 108 thousand.

The fair values are based on cash flows discounted using a rate based on the borrowing rate of 6,78% (applicable credit spread) + risk free rate for relevant currency (2021: 6,78%) and are within level 2 of the fair value hierarchy.

The table below shows non-derivative financial liabilities at 30 June 2022 and 31 December 2021 by their remaining contractual maturity:

30 June 2022

<i>In thousands of EUR</i>	Carrying amount	1 – 12 months	1 – 2 years	2 – 5 years	More than 5 years	Contractual cash flows
Non-derivative Financial liabilities						
Secured bank loans	39,756	5,539	5,446	17,135	27,624	55,744
Bonds	90,230	27,686	7,352	12,675	67,113	114,826
Lease liability	2,539	580	482	1,033	858	2,953
Other LT loans	290	193	97	0	0	290
Trade and other payables	2,849	2,849	0	0	0	2,849
Total future payments, including future principal and interest payments	135,665	36,848	13,377	30,843	95,594	176,662

31 December 2021

<i>In thousands of EUR</i>	Carrying amount	1 – 12 months	1 – 2 years	2 – 5 years	More than 5 years	Contractual cash flows
Non-derivative financial liabilities						
Secured bank loans	45,460	6,282	6,163	16,532	30,452	59,429
Bonds	81,330	29,315	6,780	10,725	58,575	105,395
Lease liability	2,273	593	345	712	913	2,563
Other LT loans	373	249	124	0	0	373
Trade and other payables	3,298	3,298	0	0	0	3,298
Total future payments, including future principal and interest payments	132,734	39,737	13,412	27,970	89,940	171,058

16. Derivative Financial Instruments

<i>In thousands of EUR</i>	30 June 2022		31 December 2021	
	Contracts with positive fair value	Contracts with negative fair value	Contracts with positive fair value	Contracts with negative fair value
Interest rate swaps, fair values, at the end of reporting period				
Hedging derivatives	4,396	-26	2,351	-49
Value of interest rate swaps	4,396	-26	2,351	-49
Net value of interest rate swaps	4,370		2,302	0
Other Derivative Financial Instruments				
Shares options (Note 10)	1,611	0	1,242	0
Net Value of Other Derivative Financial Instruments	1,611	0	1,242	0

Derivatives with positive fair values are included in Other receivables, derivatives with negative fair values are included in Other liabilities.

17. Fair Value Disclosures

Fair value measurements are analysed by level in the fair value hierarchy as follows:

- ▶ **Level 1** are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities,
- ▶ **Level 2** measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and
- ▶ **Level 3** measurements are valuations not based on observable market data (that is, unobservable inputs).

Management applies judgement in categorising financial instruments using the fair value hierarchy. If a fair value measurement uses observable inputs that require significant adjustment, that measurement is a Level 3 measurement. The significance of a valuation input is assessed against the fair value measurement in its entirety.

The fair values of financial assets and liabilities together with the carrying amounts shown in the statement of financial position are as follows. For the other financial assets/financial liabilities, the fair value approximates the carrying amount.

17.1 Recurring Fair Value Measurements

Recurring fair value measurements are those that the accounting standards require or permit in the statement of financial position at the end of each reporting period. The level in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

<i>In thousands of EUR</i>	30 June 2022				2021			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Financial assets								
Precious metals	3,755	0	0	3,755	3,227	0	0	3,227
Derivatives	4,370	0	0	4,370	2,302	0	0	2,302
Other financial investments	0	0	6,966	6,966	0	0	9,736	9,736
Non financial assets				0				
Property, plant and equipment	0	0	125,104	125,104	0	0	123,434	123,434
Total assets recurring FV measurement	8,125	0	132,070	140,195	5,529	0	133,170	138,699
Financial liabilities								
Derivatives	0	0	0	0	0	0	0	0
Total liabilities recurring FV measurement	0	0	0	0	0	0	0	0

The valuation technique, inputs used in the fair value measurement for level 3 measurements and related sensitivity to reasonably possible changes in those inputs are as follows:

30 June 2022:

<i>In thousands of EUR</i>	Fair value	Valuation technique	Inputs used	Range of inputs	Reasonable change	Sensitivity of FV measurement
Non financial assets						
Property, plant and equipment	125,104	DCF	Discount rate Production volume Revenue model	See below	See below	See below
Other financial investments	6,966	MtM	Probability estimates Expected share price	See below	See below	See below
Total assets recurring FV measurement	132,070					

31 December 2021:

<i>In thousands of EUR</i>	Fair value	Valuation technique	Inputs used	Range of inputs	Reasonable change	Sensitivity of FV measurement
Non financial assets						
Property, plant and equipment	123,434	DCF	Discount rate Production volume Revenue model	See below	See below	See below
Other financial investments	9,736	MtM	Probability estimates Expected share price	See below	See below	See below
Total assets recurring FV measurement	133,170					

The DCF Equity valuation method is based on a Discounted Cash Flow method. It includes the future cash flows available to the shareholders/providers of equity of photovoltaic projects (i.e. after all debt repayments and interests) that are later discounted by relevant discount rates (Levered Cost of Equity). The risk profile is represented by a discount rate (Levered Cost of Equity). Due to existence of senior project finance the cost of equity calculated by

CAPM formula is adjusted by Miller-Modigliani formula to achieve the most precise cost of equity levered for each project respecting its unique capital structure.

In the valuation model, a quarterly discount is applied. This is based on the fact that debt repayments are happening on quarterly

basis. This is effecting the overall change in financing structure and indirectly affecting cost of equity levered.

The used Levered Cost of Equity rates to discount estimated cash flows, vary between countries from 7.8% to 16.5% for H1 2022 (2021: 5% to 13%).

Other financial investments are stated at its fair value based on valuation models prepared by management. Other financial investments include primarily ordinary and preference shares and related share options held. The principal assumptions, in addition to the market price of the shares, are probability of the realisation of the share options granted and discount rate reflecting required return on investment on this type of the Group's investments.

Sensitivity analysis of DCF for power plants – change in Levered Cost of Equity

The below analysis shows impact of change in the used Levered Cost of Equity rates by +/-3% on the enterprise/entity value in absolute and relative figures as of 30 June 2022:

<i>In thousands of EUR</i>	Discount rate +3%	Discount rate +3% in %	Discount rate -3%	Discount rate -3% in %
HU power plants	-2,697	-5.3%	3,915	7.8%
CZ power plants	-5,439	-11.7%	6,664	14.3%
SK power plants	-1,224	-8.4%	1,549	10.6%
AU power plants	-2,168	-15.7%	3,351	24.3%

The below analysis shows impact of change in the used Levered Cost of Equity rates by +/-3% on the enterprise/entity value in absolute and relative figures as of 31 December 2021:

<i>In thousands of EUR</i>	Discount rate +3%	Discount rate +3% in %	Discount rate -3%	Discount rate -3% in %
HU power plants	-3,221	-6.4%	5,240	10.5%
CZ power plants	-5,789	-12.1%	7,109	14.9%
SK power plants	-1,591	-10.7%	2,022	13.6%
AU power plants	-3,109	-19.9%	5,226	33.5%

Sensitivity analysis of DCF for power plants – change in production output

The below analysis shows impact of change in production output by +/-2% on the enterprise/entity value in absolute and relative figures as of 30 June 2022:

<i>In thousands of EUR</i>	Production +2%	Production +2% in %	Production -2%	Production -2% in %
HU power plants	956	1.9%	-951	-1.9%
CZ power plants	902	1.9%	-902	-1.9%
SK power plants	324	2.2%	-324	-2.2%
AU power plants	268	1.9%	-268	-1.9%

The below analysis shows impact of change in production output by +/-2% on the enterprise/entity value in absolute and relative figures as of 31 December 2021:

<i>In thousands of EUR</i>	Production +2%	Production +2% in %	Production -2%	Production -2% in %
HU power plants	852	1.7%	-863	-1.7%
CZ power plants	910	1.9%	-910	-1.9%
SK power plants	361	2.4%	-361	-2.4%
AU power plants	316	2.0%	-316	-2.0%

Sensitivity analysis of DCF for power plants – change in electricity and LGC prices

The below analysis shows impact of change in electricity prices by +/-10% on the enterprise/entity value for selected power plants in absolute and relative figures as of 30 June 2022:

<i>In thousands of EUR</i>	Electricity prices +10%	Electricity prices +10% in %	Electricity prices -10%	Electricity prices -10% in %
HU power plants - FIT	35	0.3%	-35	-0.3%
HU power plants - Merchant	3,022	6.6%	-3,020	-6.6%
AU power plants - prices	1,086	7.9%	-1,086	-7.9%
AU power plants - LGCs	253	1.8%	-253	-1.8%

n/a* – as the PVP opted out from fixed feed in tariff schemes in Hungary, no sensitivity to FIT is applicable

The below analysis shows impact of change in electricity prices by +/-10% on the enterprise/entity value for selected power plants in absolute and relative figures as of 31 December 2021:

<i>In thousands of EUR</i>	Electricity prices +10%	Electricity prices +10% in %	Electricity prices -10%	Electricity prices -10% in %
HU power plants - FIT	320	0.7%	-318	-0.7%
HU power plants - Merchant	175	11.4%	-175	-11.4%
AU power plants - prices	1,332	8.5%	-1,332	-8.5%
AU power plants - LGCs	253	1.6%	-253	-1.6%

Sensitivity analysis of MtM of other financial investments – changes in significant estimates

The below analysis shows impact of change in significant estimates on the MtM value in absolute and relative figures as of 30 June 2022:

<i>In thousands of EUR</i>	Market price of the share +10%	Market price of the share +10% in %	Market price of the share -10%	Market price of the share -10% in %
Investment in Lerta SA	-*	-*	-*	-*
Investment in Raygen Resources Pty Ltd	837	12%	- 837	-12%

* No sensitivity analysis is presented for Lerta SA as at 30 June 2022, as the investment in Lerta SA has been reclassified into investments into associates

<i>In thousands of EUR</i>	Discount rate +3%	Discount rate +3% in %	Discount rate -3%	Discount rate -3% in %

17.2 Assets and Liabilities Not Measured at Fair Value but for Which Fair Value is Disclosed

Fair values analysed by level in the fair value hierarchy and the carrying value of assets and liabilities not measured at fair value are as follows:

In thousands of EUR	30 June 2021				2020			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Financial assets								
Financial assets at AC								
Trade and other receivables	0	11,774	0	11,774	0	5,332	0	5,332
Loans provided	0	2,299	0	2,299	0	1,811	0	1,811
Other	0	26,734	0	26,734	0	37,266	0	37,266
Total assets	0	40,807	0	40,807	0	44,409	0	44,409
Financial liabilities								
Borrowings								
Bank loan	0	39,756	0	39,756	0	45,460	0	45,460
Issued bonds	0	90,861	0	90,861	0	84,383	0	84,383
Lease liabilities	0	2,539	0	2,539	0	2,273	0	2,273
Other non-current liabilities	0	290	0	290	0	373	0	373
Other financial liabilities								
Trade and other payables	0	2,849	0	2,849	0	3,298	0	3,298
Total liabilities	0	136,296	0	136,296	0	135,787	0	135,787

All financial assets and financial liabilities have been defined to Level 2.

The fair values in level 2 and level 3 of the fair value hierarchy were estimated using the discounted cash flows valuation technique.

Financial Assets Carried at Amortised Cost

The fair value of floating rate instruments is normally their carrying amount. The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received

discounted at current interest rates for new instruments with similar credit risks and remaining maturities. Discount rates used depend on the credit risk of the counterparty.

Liabilities Carried at Amortised Cost

The fair value of issued bonds is based on quoted market prices. Fair values of other liabilities were determined using valuation techniques.

18. Presentation of Financial Instruments by Measurement Category

For the purposes of measurement, IFRS 9 Financial Instruments classifies financial assets into the following categories: (a) financial assets at FVTPL; (b) debt instruments at FVOCI, (c) equity instruments at FVOCI and (c) financial assets at AC. Financial assets at FVTPL have two sub-categories: (i) assets mandatorily measured at FVTPL, and (ii) assets designated as such upon initial

recognition. In addition, finance lease receivables form a separate category.

The following table provides a reconciliation of financial assets with these measurements:

30 June 2022:

<i>In thousands of EUR</i>	FVOCI	FVPL	AC	Total
Assets				
Cash and cash equivalents	0	0	20,499	20,499
Liquid assets with restriction on disposition	0	0	5,256	5,256
Precious metals	0	3,755	0	3,755
Other financial assets	5,354	1,612	0	6,966
Contract asset	0	0	978	978
Trade and other receivables	4,370	0	11,774	16,144
Loans provided	0	0	2,299	2,299
Total financial assets	9,724	5,367	40,806	55,897

As of 30 June 2022, all of the Group's financial were carried at AC.

31 December 2021:

<i>In thousands of EUR</i>	FVOCI	FVPL	AC	Total
Assets				
Cash and cash equivalents	0	0	32,506	32,506
Liquid assets with restriction on disposition	0	0	3,629	3,629
Precious metals	0	3,227	0	3,227
Other financial assets	8,494	1,242	0	9,736
Contract asset	0	0	1,131	1,131
Trade and other receivables	2,302	0	5,332	7,634
Loans provided	0	0	1,811	1,811
Total financial assets	10,796	4,469	44,409	59,674

As of 31 December 2021, all of the Group's financial were carried at AC.

19. Related Parties

Parties are generally considered to be related if the parties are under common control or if one party has the ability to control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Balances and transactions between the Company and its subsidiaries which are related parties of the Company have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

The Company is jointly controlled by Mr. Michael Gartner (via Solar Future Coöperatief U.A.) and Mr. Georg Hotar (via Solar Power to the People Coöperatief U.A.), who are the Company's directors.

At 30 June 2022, the outstanding balances with related parties were as follows:

<i>In thousands of EUR</i>	Parent companies	Joint ventures	Key management personnel
Gross amount of trade receivables	-	-	-
Loans issued	1,634		665
Investments in JV		1,768	

Loans issued to related parties include loans to Solar Age Investments B.V. and Solar Power to the People U.A. which are short term for a period of up to 12 month and bear interest rate of 3%.

At 31 December 2021, the outstanding balances with related parties were as follows:

<i>In thousands of EUR</i>	Parent companies	Joint ventures	Key management personnel
Gross amount of trade receivables	-	72	-
Loans issued	1,170	-	641
Investments in JV	-	1,626	-

Loans issued to related parties include loans to Solar Age Investments B.V. and Solar Power to the People U.A. which are short term for a period of up to 12 month and bear interest rate of 3%.

The income and expense items with related parties for the period of 6 months ended 2022 were as follows:

<i>In thousands of EUR</i>	Parent companies	Joint ventures	Key management personnel
- Interest income	173		6

The income and expense items with related parties for the year ended 31 December 2021 were as follows:

<i>In thousands of EUR</i>	Parent companies	Joint ventures	Key management personnel
Revenue from services rendered	-	72	-
- Interest income	73	-	17

There are no other rights and obligations connected to related parties at 30 June 2022 nor 31 December 2021.

Key Management Compensation

Key management includes Members of the board of directors and Senior management. Members of the board of directors did not receive any compensation during first half of 2022 nor first half of 2021 for their duties serving on the board of directors for the Group of entities. Furthermore, no emoluments of managing directors, including pension obligations were charged to the Company. No service contracts with the Company nor any of its Subsidiaries have been provided to a member of the Board of Directors for benefits upon termination of employment. Mr Georg Hotar receives a regular salary as an employee in his function as managing director of Global Investment Protection AG in Switzerland and Mr Gartner receives a regular salary as an employee in his function as managing

director of Photon Energy Australia Pty Ltd. in Australia. These compensations are in no direct relation to their Board of Director functions. The overall cost of compensations for the key management from their employment relations with the Company or its subsidiaries in the first half of 2022 amounted to EUR 607 thousand (H1 2021: EUR 347 thousand, 2021: EUR 728 thousand). The agreements between the key management with the Company or its Subsidiaries do not foresee any severance payments, company pension plans or other deferred compensation. Termination period of the agreements is up to six months. There are no commitments and contingent obligations towards key management personnel at 30 June 2022 nor 31 December 2021.

20. Subsequent Events

There were no subsequent events that would have impact on the interim consolidated financial statements.
